## RARE

### MONTAGNE DE REIMS – REIMS – N.M.

To mark the centenary of the presentation of the first prestigious cuvée by Piper-Heidsieck to Marie-Antoinette, Queen of France, the House produced a limited series of bottles in 1885: La Cuvée du Centenaire. This is the origin of Rare Champagne, in honor of the occasion, Pierre-Karl Fabergé, jeweler to the Czar Alexander III, designed a spectacular enameled bottle. A label with a faithful reproduction of the design was therefore placed on the bottles of this exclusive edition. Over the last forty years, Rare Champagne has only declared 11 vintages.

## DOMAINE PATRICE MOREUX

The origins of Domaine Murex date back to 1677 when Edme Corty laid the foundations of a small Domaine in Pouilly. It's incredible to think that their love for wine and the land spans 300 years of history and extends across 12 generations!

The plot La Loge aux Moines is part of the original Pouilly vineyard, and was in fact the first cultivated in the appellation by 11th-century Benedictine monks. Facing south, overlooking the Loire, it benefits from the first rays of sunshine, more heat during the day, and also an exceptional terroir.

## DOMAINE VACHERON

Domaine Vacheron is one of Sancerre's elite properties, producing white and red Sancerre of amazing purity and definition. The Domaine has been completely transformed over to biodynamic farming (certified by Biodyvin in 2005).

Vacheron is primarily a "silex" producer. Silex (flint) is found primarily in the eastern part of the appellation. Almost all of Vacheron's holdings are on this hard mineral soil type. Flint produces vertical, long-aging Sancerre bottlings and the Vacheron boys' biggest aim is to let this shine. The "basic" Sancerre blanc from the property comes from vines planted on the fault line between silex and Caillottes (hard shards of limestone).
