

Using the Right Tool for the Job

Composite Restoration Finishing in less than 20 Seconds

PROFil™ *Finishing Kit*

An esthetic restoration finishing method featuring morphological quality and fast restoration ability. The kit was designed to make the tough task of composite finishing significantly simpler, shorter and more efficient while giving excellent clinical results.

- No need to use polishing discs / rubber polishers
- Faster work – 10-20 seconds instead of 3-5 minutes
- Much more cost effective – save up to 75%
- No bleeding - Doesn't cut the gingival
- Quick and easy learning curve
- Very durable
- Autoclavable
