

3D model shows strong benefits of SG10

Northpine's new 3D Scale Model shows quickly and clearly the benefits of designing with SG10. Rafters, walls, bearers and joists ...- in terms of energy efficiency, sustainability and value for money, SG10 is a winner. See for yourself by looking over [these images](#).

The truth about SG10

Designers are sometimes advised by builders and/or merchants to 'forget SG10 and redo their plans using SG8', or words to that effect.

The facts:

- SG10 is an engineering grade of structural timber where design requires higher strength and/or stiffness.
- Northpine regularly produces good volumes of SG10 as part of its specialist product range called NORTHBEAM. It is available via timber merchants nationwide (Carters, ITM, PlaceMakers, Mitre10, Bunnings etc)
- By definition, Northpine SG10 is stronger and denser than SG8 and is independently grade- verified by GradeRight.
- Northpine SG10 can be ordered in small 'piece lots'. You order only what you need.

Mangawhai Shared Path – Phase 2 (Te Ara o Te Whai)

It's all done and dusted! The impressive new boardwalk parallel to the bridge at Molesworth Drive across the estuary was opened to the public in late August. It completes a very challenging mission for contractor Fulton Hogan through 'the summer that never was'! Watch the video below and listen to project engineer Brett Vermeulen explaining the achievement.

This is the second of five phases in Kaipara District Council's plan to connect Mangawhai Village with Mangawhai Heads. Northpine supplied all the solid beams, posts and battens for the boardwalk. **Northbeam is strong stuff!**

Ruakura Superhub, Hamilton

Keir Landscaping (KLS) constructed this boardwalk in Te Wairepo, one of three Reserves that comprise the Green Spaces within the Ruakura Superhub for Waikato-Tainui Holdings. The 490-ha Superhub is a multi-use development anchored by Hamilton's inland port containing logistics, industrial, commercial, retail and green spaces, with homes for 4,500 families – and only 4km from Hamilton's CBD.
