## GTMAX

### Offering a CNC alternative to Cam driven screw machines

The GTMax combines the speed of cam-driven automatic lathes with the ease of setup of a modern CNC.

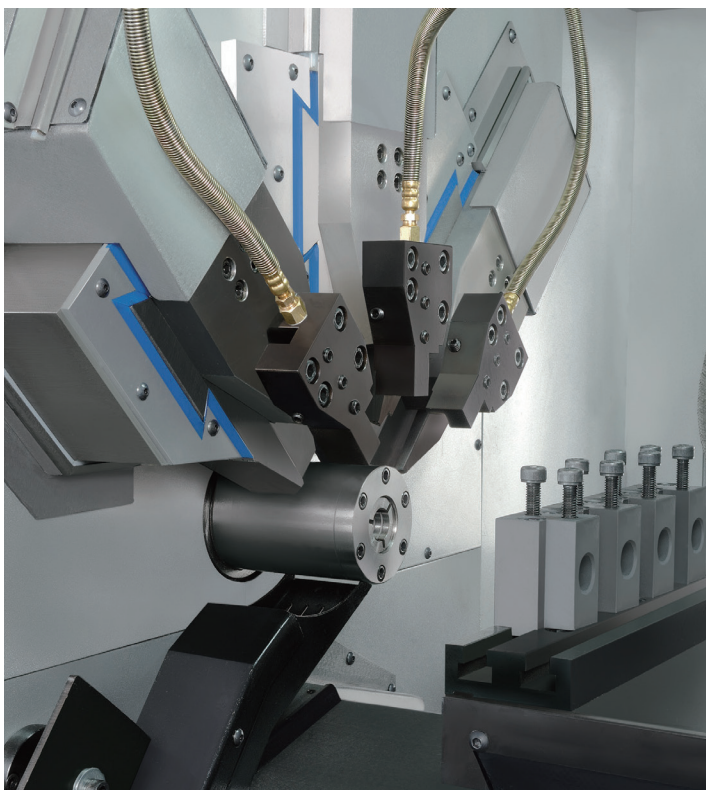

By utilizing a 3 O.D. tool slides with a twin spindle gang tool setup, the GTMax can make up to 4 simultaneous cuts, dramatically decreasing processing time.

Available in 25 or 42 mm, the GTMax comes stock with a Fanuc Control

The Cubic GTMax multi-slide CNC lathe will be on display at the 2018 IMTS in September at the McCormick Place in Chicago. Make your arrangements to see this game changing machine now.

Come see the GT Max in action  
at Cubic's Booth # 339163 in the  
south building on the 3rd floor at  
IMTS this September.

For more information on the GT Max and  
possible show deals please call:
