

CUBIC MACHINERY

Newsletter | May 2017

We are pleased
to announce another
successful year at

PMTS 2017!

It was a pleasure
reaching out to manufacturers in Ohio!

Cubic distinguished itself from the competition through its utilization of gang tools

Cubic is your one-stop shop for machine tools, service, and automation.

Attendees witnessed the unrivaled speed and productivity of gang tool machining showcased by the new GT Max-25 and reliable GTV-27. Built to replace Brown & Sharpe screw machines, the GT Max drew the most attention from manufacturers. With

three cross-slides, gang tool post, and optional C-axis with live tool, the GT Max is truly in a class of its own. That's not to say the GTV didn't carry its weight! As always, the GTV earned its spot by demonstrating its hard turning, engraving, and broaching capabilities.
