## Cubic's Innovations

**C**ubic Machinery is excited to announce that we will be exhibiting our latest advances in automation at IMTS 2016, the largest manufacturing technology tradeshow in North America! Our booth will be located in the main hall alongside some of the heaviest hitters in the metal cutting industry.

With over 2,000 exhibiting companies attending, we look forward to demonstrating the engineering power that has enabled us to lead the way in automated production. We will be demoing FANUC's first collaborative industrial robot, as well as unveiling the new additions to our line of CNC machinery.

***Stop by Booth S-9163 to meet the Cubic Team!***
