

5 THINGS TO CONSIDER WHEN CHOOSING YOUR SAFARI

A

t Safari by Z, all of the camps and lodges you see on our website are hand-picked by us. We have visited all of the properties, and continually review guest feedback to ensure the highest quality accommodation for guests.

Within the Serengeti, our camps and lodges are selected based on the migration timetable - you'll be right in the heart of the parks for an unforgettable safari experience.

Take a look at our website to explore the Safari by Z itineraries, or contact info@safaribyz.com for any questions about how to select the right safari for you.

#1 EXPERIENCE LEVEL OF DRIVERS & GUIDES

It's crucial your guide knows the best place to spot game and find the great migration while on safari. It's not uncommon to see lost drivers circling the parks near to closing time.

All Safari by Z drivers have at least 5 years' experience, with each driver having their understanding of the parks continually tested to ensure their knowledge is unparalleled.

#2 CHOOSE THE RIGHT PARK FOR THE RIGHT TIME OF YEAR

Weather patterns and movements of animal migration means it is vital to check which parks to visit and when. From August to November for example, the majority of the 1.5 million wildebeest and Zebra can be seen in the north of the Serengeti on the Kenyan side of the Mara river as they migrate. Viewing opportunities are limited in the Southern Serengeti during this time.

Unsure when is best to visit? Contact Safari by Z with your suggested dates and we can hand-pick a safari route to maximise your game viewing time.

#3 BACKUP AND SUPPORT

Choosing a company that can provide full backup and support if anything goes wrong is crucial when selecting your safari. It's also important to ensure you receive a smooth transition journey onto Zanzibar and beyond.

Safari by Z ground staff are on hand to ensure you receive a seamless safari experience. With offices in London, Arusha and Zanzibar - our team is available around the clock to answer any questions or concerns.

#4 ACCOMMODATION QUALITY

Accommodation quality can vary when on safari. Many providers only promote their own camps and lodges, so do check independent reviews of any camps or lodges you're interested in.

#5 OUR LAND ROVER VEHICLE SPECIFICATIONS

It's important to ensure the vehicle you're travelling in is safe and well-suited to your needs. Ask for details of the vehicle type and age before booking, also check the height of safari viewing windows and ensure the vehicle is equipped with an emergency radio.

All Safari by Z vehicles were converted less than 2 years ago, and we only use UK-made Land Rovers. All our vehicles have in-built tracking and come with full height, side and front windows for maximum game viewing opportunities. Our Land Rovers are equipped with on-board fridges, USB charging points, onboard wifi, binoculars and reclining seats for maximum comfort.
