Heat Distribution / TV Kit

In the past, wall mounted televisions or treasured decor pieces would degrade over time from the excess rising heat produced by your gas fireplace. Our new Heat Distribution / TV Kit for the C Series allows you to make use of the valuable real estate directly above your linear gas fireplace. It can channel heat inside the wall and vent it out above the fireplace or into an adjacent room.

Opening bezel can be painted to blend with wall color

Dual vents reduce surface temperature and evenly channel rising heat

Optional Surround

Create stronger focus on the flames by adding a powder coated, brushed nickel, or brushed antique copper borderview surround.

Optional Heat Distribution / TV Kit

This heat distribution / TV kit channels hot air away from wall mounted TV's placed directly above the unit or it can pass heat into nearby rooms.

Hidden Pilot System

The C Series uses a hidden pilot system diagonally recessed on a far edge so as not to obstruct the overall look of the burn.

Optional Dual Blower Kit

This optional 220 CFM fan assembly operates with a left and right fan to help evenly push warm air further into the room.
