

GetBusy achieves 'Built for NetSuite' status as it provides NetSuite users with leading document functionality

GetBusy has announced today (5th May 2021) that it has achieved its 'Built for NetSuite' status and has successfully integrated into NetSuite's ERP solution. Users will now be able to enjoy additional functionality, including the ability to quickly and compliantly send, sign and store documents with easy future recall.

The new SuiteApp, built using the Oracle NetSuite SuiteCloud Platform, solves several key frustrations businesses experience when dealing with document storage and transfer. These include: critical files being held in multiple places, time wasted searching for documents, and compliance and security worries of missing or disorganised files.

GetBusy provides an easy solution to these common problems by enabling users to share trackable files internally and externally with the additional benefit of unlimited e-signatures being built in. The integration also extends existing NetSuite functionality by allowing users to quickly drag and drop large files (200mb) against NetSuite relationship records.

Daniel Rabie, CEO of GetBusy said: "GetBusy is thrilled to cement its strategic partnership with NetSuite. The relationship gives us a fantastic platform to integrate our productivity and task management solution directly into the NetSuite ecosystem.

As an organisation, our mission is to enhance the productivity and day-to-day happiness of individuals. We do this by providing the tools to help them save time, achieve more and ultimately be more successful. I'm so excited to bring our unique tool to life within NetSuite and further enhance what is an outstanding ERP solution."

"Improving the speed and accuracy in which businesses send, sign and store documents is essential to their success" said Guido Haarmans, vice president, SuiteCloud Developer Network and Partner Programs, Oracle NetSuite. "This new SuiteApp extends our robust solution for document management, storage, and productivity, and helps NetSuite customers complete vital business communications more effortlessly."

GETBUSY

Built for NetSuite is a program for NetSuite SuiteCloud Developer Network (SDN) partners that provides partners with the information, resources, and methodology required to help them verify that their applications and integrations meet NetSuite standards and best practices. The Built for NetSuite program is designed to give NetSuite customers additional confidence that SuiteApps, like GetBusy, have been built to meet these standards.
