

# COMPCORE

## 12MM SOLID CORE WORKTOPS

By Mica Post Form

In 6 modern colours with  
colour matching cores.

## WHAT IS COMPACT LAMINATE

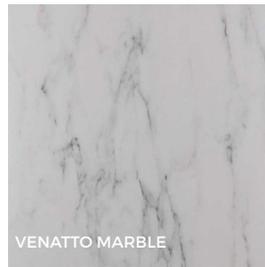

Normal laminate worktops have a thin layer of laminate which is bonded onto a chipboard core. Compact laminate is produced by pressing many layers of laminate together to create a self supporting, and waterproof material in its own right!

### AVAILABLE SIZES EX-STOCK

**Worktops**  
*(polished 2 long sides)*  
3050X650X12mm

**Breakfast Bars**  
*(polished 2 long sides)*

3050x100x12mm

VENATTO MARBLE

ITALIAN SLATE

GREY SHUTTERED CONCRETE

BLACK SLATE

ANDROMEDA STORM

ANDROMEDA WHITE

COLOURS ARE INDICATIVE

If our stock range of sizes do not suit, we offer a cut to size service.

Worktops can be finished to any size within these dimensions and curved on one or more corners, to your specification.

These worktops are particularly well suited for under-mounted sink applications.

## BESPOKE SHAPES & SIZES

We also offer a bespoke cut to order service where any of our Compact range is available up to 3050mm long and up to 1200mm wide.

## WATERPROOF

Because the material is, in essence, a solid laminate throughout, there is no chipboard which means the worktop is 100% waterproof. In fact this material has been used for years in shower cubicles and exterior building cladding. Only recently has the material found a use as a worktop surface.

## DIY

With a standard DIY tool a worktop can be cut, polished and installed on site contrary to quartz and granite which has to be installed by specialists.

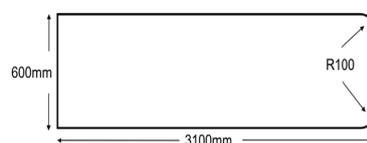

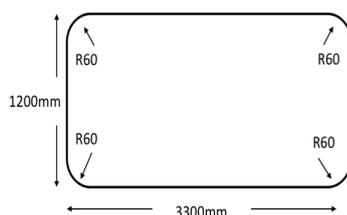

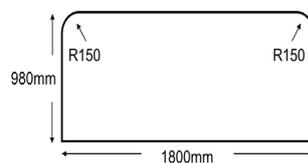

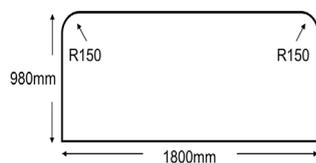

## CHEAPER THAN STONE EQUIVALENTS

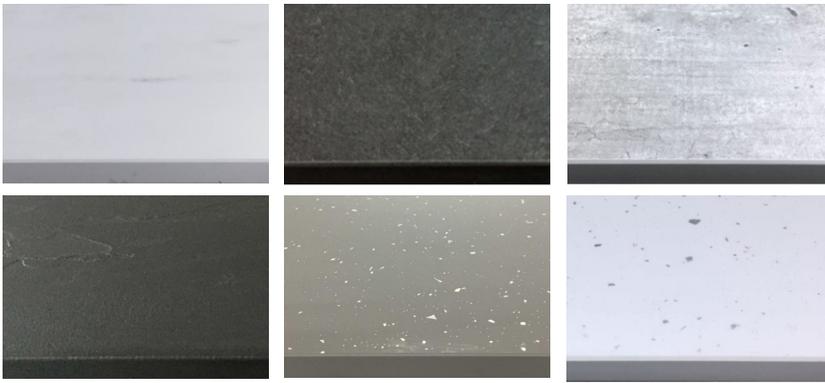

Given the worktop can be cut on site, the costs are significantly less than quartz or granite alternatives.

## FEATURES

- 12mm solid matching core
- Polished cores finished white, black and grey
- All standard sizes ex-stock and individually packed - minimal lead time
- Easy to maintain - just wipe with warm soapy water
- Bespoke cutting service to your specification
- Cut outs for sinks and draining grooves also available

SKETCHES NOT TO SCALE - FOR ILLUSTRATION PURPOSES

Available ex-stock with 6 matching cores.
