

Film Developing Services

We offer two levels of service. Our Pro Lab offers dip and dunk processing for the best quality developing with prints done on Fuji Crystal Archive II Paper. Our Value Lab offers machine processing and printing for a more budget friendly option. Both services require us to ship the film back and forth. All film shipped is expertly packed and sent via UPS Ground with tracking.

Pro Lab

- Film developed in Refrema dip & dunk machine
- 35mm, 120/220, 4x5/8x10 sheet film
- Push/Pull is available from -2 stops to +2 stops
- Cross Processing available at no additional charge
- Prints are done on Fuji Crystal Archive Type II Paper in glossy or matte
- Scans available in Low Res (4.5mb) or High Res (18mb)
- All processors run with full battery back up to ensure uninterrupted processing even during power failures

Value Lab

- Film is processed using a Noritsu machine
- 35mm only
- Prints are available in glossy or matte
- Only Standard Resolution scans are available at time of processing
