CREATE A PROJECT PLAN IN TEAMGANTT

We've said it before, and we'll say it again: Practice makes perfect! And that's just what this homework assignment is meant to do.

Before you create a behemoth project in TeamGantt, we suggest taking a simple personal project plan for a spin, just so you can get comfortable with listing tasks and subtasks.

Of course, if you've taken Class 03 on estimating and are ready to jump straight in, skip this homework (you got a 100% woo!), and go for it!

THE ASSIGNMENT

You'll need a TeamGantt account to complete this homework assignment. Don't have one? Sign up for free at teamgantt.com/signup!

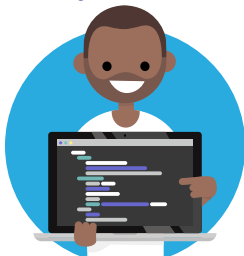

CREATE A PLAN

Lucky you! It's your turn to host a monthly family dinner for 12 people. Don't worry: With a solid plan outlined, you'll totally nail this!

Use TeamGantt to outline all the steps you'll need to take to plan a nice dinner. Be sure to think about invitations, your menu, ingredients, shopping, cooking, cleaning, and anything else that might be involved.

If you need a refresher on how to use TeamGantt, check out our [help docs](#).

Show your work!

We'd love to see your projects and estimates—and so would your fellow classmates! Feel free to take a screenshot of your estimate and share it in the class comments!
