Mede/Analytics®

Make Even Smarter Decisions

Are you getting the most out of your analytics?

Today's healthcare challenges create potential that shouldn't be left untapped.

Growing volume of data

Healthcare data growing

48%

per year, the largest growth of data in any industry[1]

Unstructured data

Approximately

80%

of enterprise data unusable in current form[1]

Wasteful spending

The U.S. generates

$1T

in excessive healthcare spending per year[2]

Operational inefficiencies

Health data generates

$300B

in untapped annual value for US healthcare[3]

Analytics is the #1 area of increased spend among healthcare payers[4]

1. Data analytics software market expected to grow at a rate of 15% annually[4]

2. Healthcare data to exceed 10 zettabytes by 2025[4]

3. New business and operating models scale easily using analytics[4]

4. Revenue, growth and improved engagement among stakeholders[5]

5. Transition to value-based care drives revenue and growth

> We exist to improve the health of the patients, members and communities we serve. As healthcare becomes more complex, having unified reporting and analytics tools becomes increasingly important to our work to care for those we serve.
