

## WHAT IS HAZEL HEALTH?

Hazel provides in-school physical and behavioral healthcare to over 1.5 million students and counting. Hazel's team of pediatric experts provide all children with high-quality, culturally-competent healthcare in school and at home.

## PHYSICAL + BEHAVIORAL HEALTH

More than 20 million children in the U.S. lack sufficient access to essential healthcare. Hazel has developed the leading solution for high quality on demand pediatric and behavioral healthcare for all students.

Hazel uses technology specifically developed for schools to support health services and improve student health. Each in-school visit with Hazel saves an average of 3 hours of lost instructional time. Our providers support common ailments such as headaches, asthma, colds, rashes, diabetes, and more.

Students are currently facing an unprecedented mental health crisis. During the Covid-19 pandemic, symptoms of moderate to severe depression in teens have doubled and pediatric ER admissions for mental health have increased 31%. Teachers, counselors, and nurses will face this as students return and healing will take time.

## HEART™ PROTOCOL

The Hazel HEART Protocol™ increases access to timely and quality mental health care for students. The HEART Protocol™ is delivered in conjunction with Hazel's urgent care model, creating a single entry point to comprehensive student health. Hazel offers a Behavioral Health Assessment, Student Assistance Program, Crisis Consultation and Care Management solution to meet a variety of student needs. HEART Protocol™ meets the needs of school districts for a scalable mental health solution.

## THE HAZEL DIFFERENCE

**40%** of Hazel providers are persons of color

**5 minutes** or less average wait time

Parents saved **3 hours** of missed work per visit

**40%** of Hazel families report they do not have a regular PCP
