UNITE TEXAS

Building healthier communities together

We connect health and social care.

Unite Texas is a coordinated care network of health and social service organizations. Partners in the network are connected through Unite Us' shared technology platform, which enables them to send and receive electronic referrals, address people's social needs, and improve health across communities.

Network partners can:

Easily **refer and connect** your clients to local resources.

Improve your clients' well-being through access to a **variety of services.**

Increase efficiency and capacity with secure, smarter referrals.

Track outcomes of all referrals and services delivered to your clients.

Measure the impact of your organization and the services you deliver.

Identify gaps in needs to **proactively address barriers to care** and increase health equity.

How does it work?

Anna shows up at Sue's organization.

Screening

Sue screens Anna and identifies that she has additional needs.

Referral

Sue uses the Unite Us Platform to gain digital consent and electronically refer Anna to multiple community partners. Through the platform, she can seamlessly communicate with the other organizations and securely share Anna's information.

Resolution

Feedback

As Anna receives care, Sue receives real-time updates and tracks Anna's total health journey.
