

## Improvements to Oklahoma Cut Off/East 3<sup>rd</sup> St. Area (SL 267/SH 240)

6/29/2023

Over the next few weeks, roadway construction will be occurring on the Oklahoma Cut Off and the East 3<sup>rd</sup> St. area. This work will include a new hot mix overlay, drainage improvements, and the removal of the northernmost access point to Barry Street.

The overlay will take several days with various traffic control setups. No homes or businesses will be isolated, but traffic may be rerouted or experience delays. The drainage improvement work should not impact traffic.

The northernmost access point to Barry St. will be permanently removed to improve traffic safety. All traffic is encouraged to use the East 3<sup>rd</sup> St. intersection to the north or the East College St. intersection to the south. Please see the map below.

We appreciate everyone's patience during construction; we will minimize traffic delays as much as possible. If you have any questions or concerns, please call TxDOT at (940-322-8669)
