

# Obbe Single-user Sink - Events

Single unit  
Compact  
Easy to fill

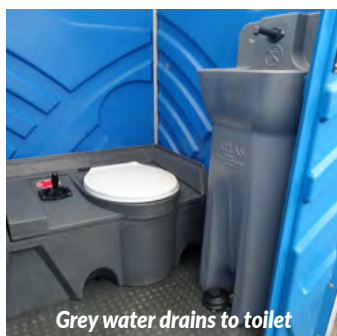

## Single-user sink - event and off-grid hand-washing

A practical, single-user sink to provide hand-washing in off-grid situations and often used in event industry portable toilets. Uses a foot-operated pump for optimal hygiene. Complete with screw cap on front face for filling. Designed to be fixed inside a portable toilet or against a wall or backboard for stability.

34 litre fresh water capacity. Grey water drains to left or right through an external hose to toilet waste tank or suitable drain, bucket or container.

Overview

# Obbe Single-user Sink - Events

## How does it work?

*This small bowl sink can be installed on the left-hand or right-hand side\* (on entry) of many portable toilet units and offers a bowl more suitable for event toilets.*

*The sink pedestal acts as the fresh water chamber, is filled using the filler cap on the pedestal and can be drained via a 3/4" brass drain plug at the base.*

- Press the foot-operated pump to dispense fresh water into the sink bowl
- Soapy "grey" water drains from the sink bowl via a 3/4" hose to the toilet tank
- The sink is typically cleaned and replenished with fresh water during the standard cleaning schedule arranged with a serviced portable toilet rental company.

### Portable toilet installation
