

Flat Tank and Elsan® Tipping Point

Our Expert Solution

Fledgling Farm Campsite's Anthony & Ruth Key wanted to create a solution and a setting that would satisfy the requirements of the Camping & Caravanning Club and would also be aesthetically pleasing and easy to access.

After initial contact with the Glampsan team at an exhibition followed by phone call consultations, they soon settled for the suggested combination of the 750-gallon Flat Tank and Elsan® Tipping Point as a startup kit.

With the choice made, ordered and delivered they decided to increase the appearance by building a picket fence around the disposal area and have since added a fresh water supply and a stand for the Tipping point's lid whilst it is in use. As the site developed they also ordered optional extras: an odour trap, an alarm to give wireless warnings of high liquid levels and a supply of HD2 Recirc, a perfumed, bacterial cleansing liquid to sanitise and cleanse the tank.

TESTIMONIAL

Anthony Key
 Fledgling Farm Campsite

*"The team at Glampsan were friendly, knowledgeable and extremely helpful," says Anthony.
 "Their plastic waste tank and Elsan Tipping Point are the perfect solution for our camp site.
 The additional products we bought from them later have integrated seamlessly."*

Tipping Point mounted on tank

4" waste pipe from Tipping Point

Also accepts toilet / shower waste

Discreet, professional appearance

Name of Project

Fledgling Farm Campsite

Location

Staffordshire, UK

Project Challenge

To gain certification from the Camping & Caravanning Club, this off-grid caravan and camping site was required to supply water and waste facilities for visitors. Although mains water was readily available for rinsing purposes, they needed to provide a **chemical toilet disposal solution** for the professional and effective disposal and control of chemiloo waste from their customers' own Elsan® type chemiloo toilets for later collection by a registered waste carrier..

Equipment Provided

- 750 gallon (3410 litres) Flat Tank
- Elsan® Tipping Point
- Odour Trap
- High Level Alarm
- HD2 Cleansing Liquid
- Full consultancy service
