

KITCHEN CABIN

Modern well-equipped kitchen

COMPLETE KITCHEN

-
- Ceramic hob with built-in oven
 - Fridge, freezer, dishwasher, coffee machine
 - Table for 6 people as well as upper and lower cupboards
 - XPS insulation, radiator, ventilation and LED lights'
 - Highest quality and corrosion protection
 - Quick to set up, clean and maintain

FACILITIES AND DESIGN

COMPLETE KITCHEN

The kitchen cabin is a complete kitchen with all necessary amenities such as a ceramic hob, built-in oven, stove, microwave, refrigerator and dishwasher as well as top and bottom cabinets. The cabin is equipped with a dining table for 6 people and a fixed bench for changing.

ELEGANT DESIGN

The cabin has a simple and stylish design that gives the user a sense of spaciousness and comfort. The cabin uses LED strips for a comfortable white and energy-friendly light. The excellent insulation, heat source and ventilation make the cabin comfortable to stay in both summer and winter.

OUTSTANDING BUILD QUALITY

SINGLE MOULDED ROOF

All Scanvogn's trailers are built with a single moulded roof. This ensures that the trailer stays waterproof under all weather conditions. The roof has a slight curve for optimal strength and to prevent rain from gathering on top. The roof has a gutter system that helps guide rain away from doors and windows.

REINFORCED EDGE JOINTS

All outer walls are cut with rabbet joints and placed so the grooves completely cover the edges of the floor. Likewise, corners are cut and glued together with rabbet joints and strengthened with anodized aluminum profiles. This maximizes structural integrity and tightness to ensure the highest quality.

EXCEPTIONAL PROTECTION

COMPLETELY GALVANISED

We only accept the highest standards in corrosion protection. All our trailers are built on a strong hot-dipped galvanized chassis. The treatment doesn't take place until the chassis has gone through the entire mechanical process. As a result no edges, joints or drilling holes are left unprotected.

LONGER LIFE EXPECTANCY

There are other products on the market where the galvanizing takes place before the chassis has gone through the mechanical process. This increases the likelihood of corrosion and reduces life expectancy. Some of our customers have trailers that are over 20 years old without any signs of severe corrosion.

APPLICATION & EFFICIENCY

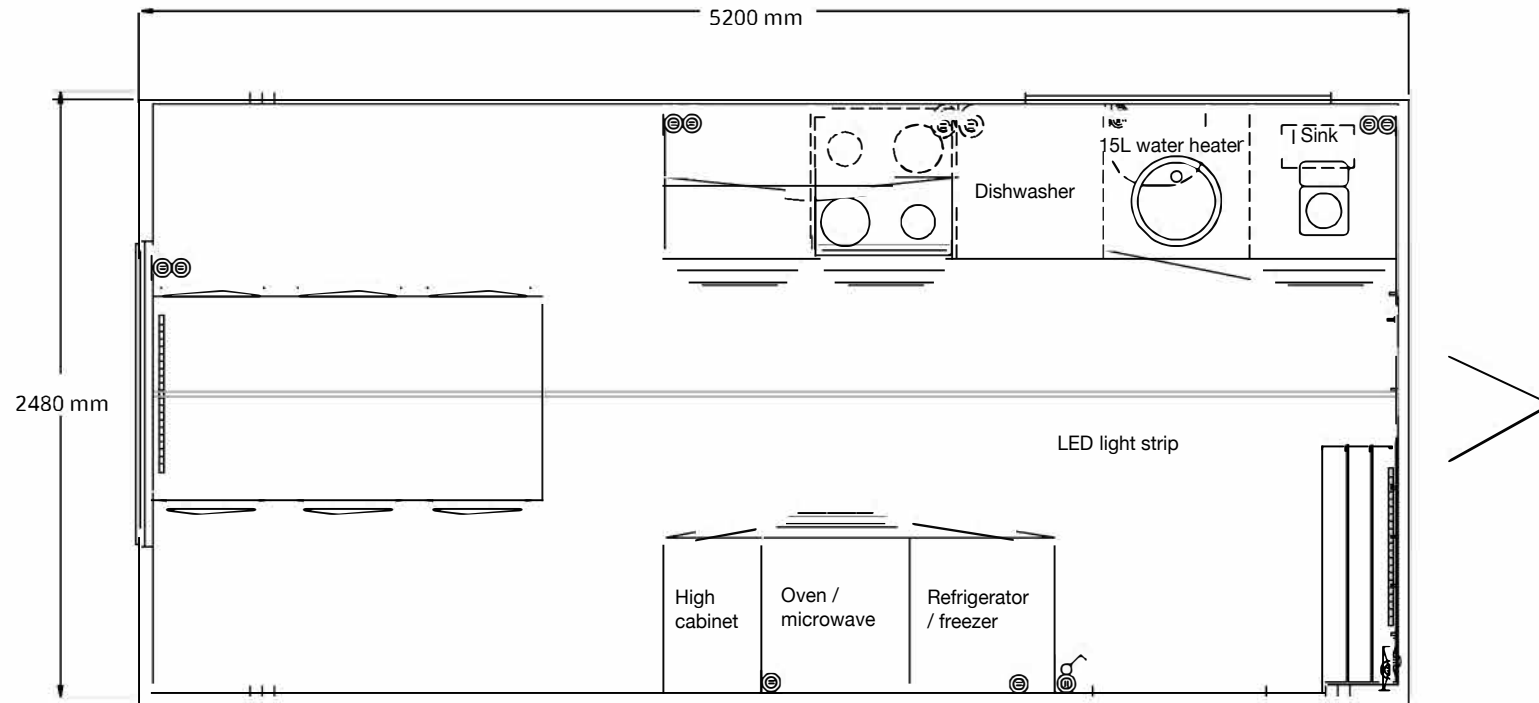

A KITCHEN FOR EVERYONE

The kitchen cabin contains all the necessary kitchen facilities and is often used at construction sites and festivals as well as by people who temporarily do not have access to their own kitchen. It is also possible to build the cabin as a sales cabin with an industrial kitchen and sales hatch, to serve food to many.

EASY TO USE, QUICK TO CLEAN

The cabin connects to a standard tow bar and can be set up and ready in minutes. This allows you to move the cabin from one place to another, quickly and efficiently and without any hassle. The cabin is made from cleaning-friendly and durable materials, saving you time on cleaning and maintenance.

KITCHEN CABIN-MODEL 520

All dimensions and weights are subject to change.

Ext: 5200 x 2480 x 2900 mm
 Int: 5096 x 2376 x 2100 mm
 Own weight: 1750 kg
 Total weight: 2000 kg
 Capacity: 6 people

Kitchen counter-top
 Kitchen sink
 Kitchen hob + oven
 Refrigerator/freezer

Dishwasher
 Coffee machine

 Electric switchboard

1 counter top with sink
 3 cupboards with drawers
 2 top cupboards
 2 tall cupboards
 Free standing steps

Table 1800 x 690 mm + 6 chairs
 Bench + 6 coat hooks
 2 windows 1245 x 825 mm
 1 window shutters
 1 towel holder

400 V - 16 ACEE inlet
 230 V - 16 ACEE outlet 1
 750 W radiator
 1 500 W electric radiator
 15 L water heater

OPTIONS

One of the biggest advantages of a cabin from Scavnogn is the high degree of flexibility in the form of customized solutions. We produce the majority of all components ourselves and work closely with our suppliers to develop parts that optimize quality, design and functionality.

The result is that Scavnogn can offer a wide range of attractive configurations for sanitation, decontamination, residential, office and kitchen, which meet most of our customers' needs. Therefore, we always strive to involve customers in the design process to achieve the greatest satisfaction.

For example, we allow the customer to choose between 4 different toilet solutions based on water consumption, interior design and comfort. The solutions include a water-flushing toilet with and without a waste disposal unit, a water-saving vacuum toilet, a self-contained toilet and a combustion toilet.

The majority of Scavnogn's cabins can be built to be fully or partially self-contained with water and sewage tanks, solar cells, batteries and gas. The capacity of water, electricity and gas can be adjusted as needed. For example, our smallest toilet cabin has capacity for 200 flushes, while our largest toilet cabin has capacity for up to 1500 flushes.

SCANVOGN

Scanvogn is Scandinavia's leading manufacturer of mobile solutions for the construction and event industry. Our core products consist of trailers for accommodation, office, dining, sanitation, bathing, decontamination and refrigeration as well as custom solutions for organizations operating in remote areas lacking secure and sanitary facilities.

Our products are known for their high quality and comfort. They are constructed using lightweight non-organic materials offering a high degree of insulation, hygiene and durability. They are utilized in numerous parts of the world ranging from the hottest to the coldest climates.

Scanvogn is based in northern Denmark and employs 150 people in its 9000m² factory. We produce most parts in-house which enables us to deliver highly customized trailers and parts for customers with specific requirements.

With over 20 years of development and innovation Scanvogn has the experience and competence to turn our customers' ideas into functional solutions and produce them on a large scale.
