Cutting tool Reconditioning and sharpening service

# Original re-grinding service

## PCD and TCT drilling and reaming cutting tools

The PREZISS-SERVICE covers all work for the refurbishment of drilling and reaming tools of all makes. The tools of the PREZISS DIAMANT company and the non original PREZISS cutting tools are refurbished to the original quality.

PREZISS DIAMANT certifies and guarantees you absolutely professional tool refurbishment. by exactly defined by a strictly controlled and documented process on high-tech machines with original re-grinding. This enables us to provide a cutting performance of up to 100% in the refurbishment of your tools in comparison to a new tool.

### The benefits for you:

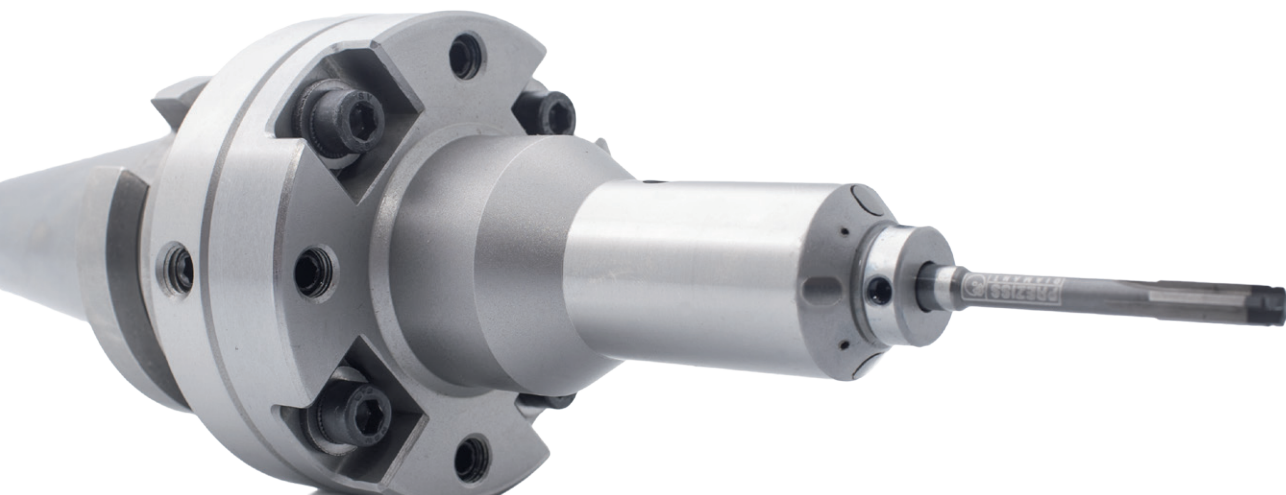

- Increase of the tool life.

- Cost reduction.

- On-time delivery.

- Precise measurement methods

- Meticulous final inspection

# service

Cutting tool Reconditioning and sharpening service

Our refurbishing team experts provide you with comprehensive advice. Our technical engineers check the tools individually and according to our rigorous criteria for the restoration of the original geometry or original tolerances fitting.

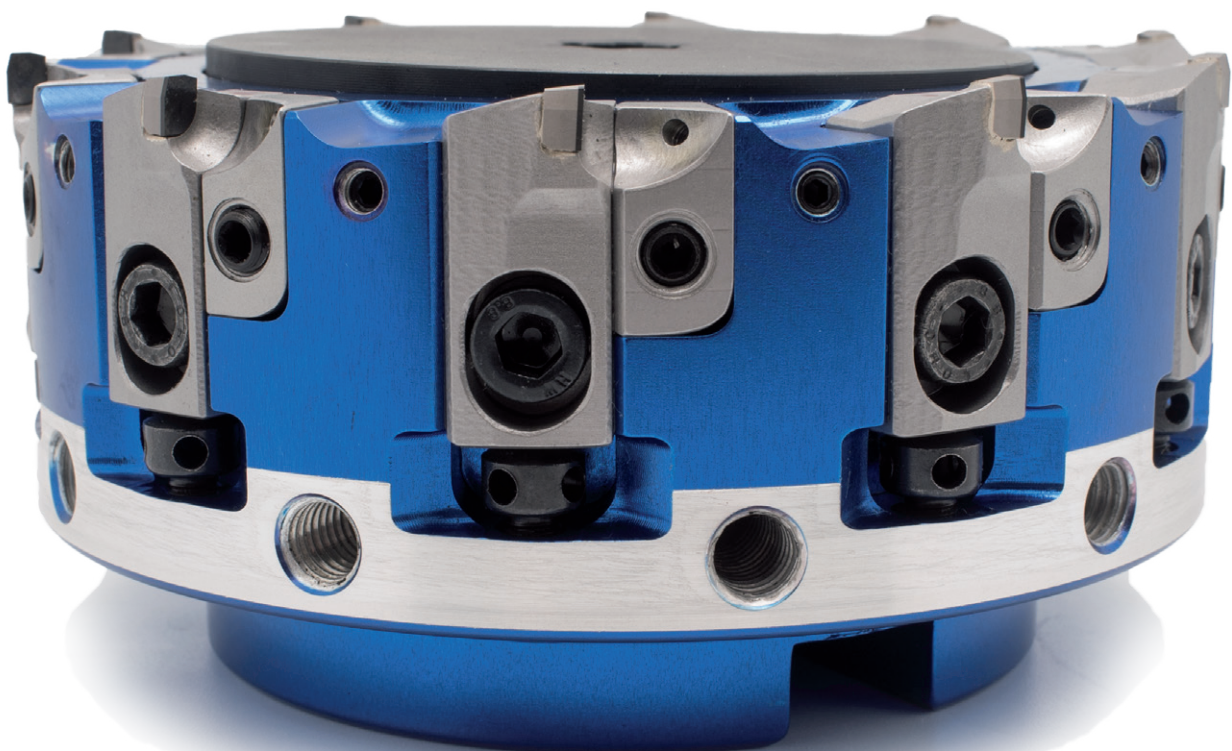

Reconditioning team makes an input report to assess reconstruction works to be done in the cutting tool in order to decide whether to go for refurbishment or replacement.

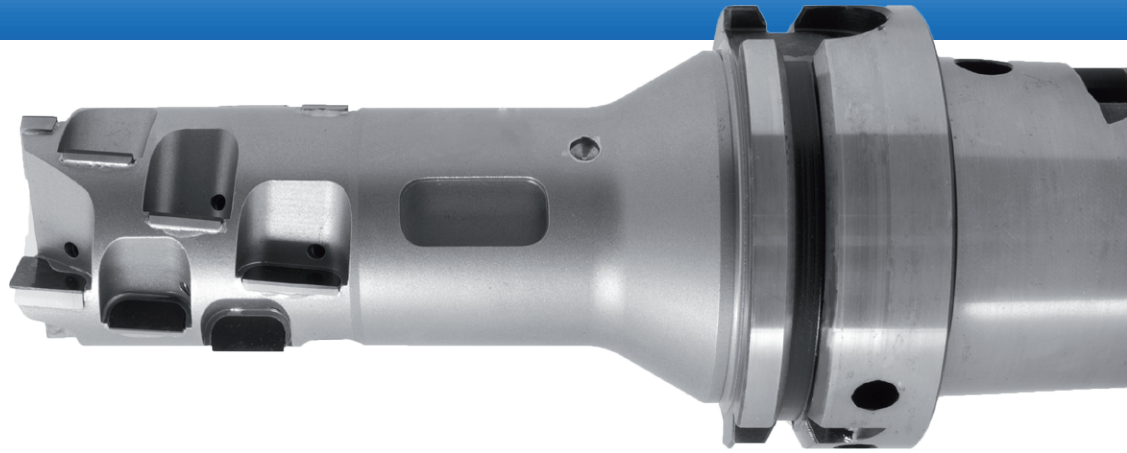

## Milling tools reconditioning

PREZISS DIAMANT Reconditioning Services help you optimize the value of your pcd cutting tools throughout their service lives by giving them “like-new” performance characteristics — in rapid turnaround time — so the tools you need are always on-hand
