

## **International Quality Inspector**

We're looking for a responsible, articulate and motivated inspectors who can quickly identify vulnerabilities and issues with manufacturing projects and processes, and then create innovative solutions to the problem. The inspectors are responsible for managing the resources and focusing on three main areas Quality, Pricing, and Delivery. **The positions are in the Southern providences of China and Chennai, India, they will be working remotely. Travel will be required in the role.**

- Work closely with the US Project Management team to understand and the client's manufacturing needs, from the design phase through product delivery
- Manage PM's expectations, anticipate operational and tactical risks with projects
- Collaborate with our US PM team to locate, qualify, and negotiate with new vendors
- Clarify and identify issues, remove barriers to resolve minor issues and escalate to immediate manager where required
- Track production and quality control for projects to ensure 889's quality standards and delivery time-tables are met
- Communicate with multiple parties throughout the quoting including production and delivery, our Asian factories, US PM team members and management
- Identify and help to qualify new vendors with the US PM team.
- Handle both product and factory quality inspections according to 889's QC procedures

## **Key Qualifications**

- Quick and assertive, highly self-motivated, with a positive team focused attitude
- Extremely detailed oriented, organized with exceptional time management skills
- Strong communication skills, written and verbal
- Ability to prioritize, and refine minute details for multiple projects simultaneously
- Cool, calm, collected and collaborative work well under pressure and comfortable with change and complexity in dynamic environments
- Can shift readily between the "big picture" and the small-but-crucial details, knowing when to concentrate on each
- Ability to develop and maintain strong collaborative relationships with vendors and team members

## **EDUCATION/EXPERIENCE**

- Associate Degree/Bachelor's Degree/ or high school and equivalent experience
- Experience working within/with International languages and cultures
- Experience in sourcing, quoting, and quality assurance is required with different manufacturing processes including metal stampings, castings, forgings, aluminum extrusion, clean room and plastics
- Ability to interpret component part drawings and prints

## **COMPENSATION**

We offer a competitive base salary, and the opportunity to earn a generous commission.
