

ACOUSTICAL CEILING PANELS

CREATIVE CLOUDS

LIMITLESS DESIGN

Cardinal Creative Clouds are decorative cloud panels available in shapes such as circles, hexagons, parallelograms, and more. These panels offer the same excellent sound absorption as standard Cardinal Clouds and are an aesthetically pleasing choice in areas where free-floating acoustical treatment is desired.

Because our Creative Clouds are fabricated with T-profiles cut, the installer can simply slide the main T into the profile. The panels can be suspended with hanging wire.

APPLICATIONS

- Educational centers
- Churches
- Restaurants
- University buildings

FEATURES

- Standard or customized shapes
- Suspends from any structure
- Individual/free-floating panel
