| Project Title | South East CP5 MFF |
| Value | TBC |
| Programme Duration | On Going |
| Client | Bam Nuttall Ltd |

About The Project

BAM Nuttall and Costain were awarded separate routes in the CP5 Southern Area, Sussex and Kent Multi-Functional Frameworks (MFF) respectively. After award Network Rail (NR), Project Manager under the contract, merged to form one "South East (SE)" route. Utilising the NEC3 form of contract and working with mutual trust and cooperation, BAM and Costain have come together to enhance delivery. The scope of the SE MFF is to design and construct Network Rail's Structures and Geotechnical Renewals, Buildings, Enhancements, multi-disciplinary projects across the South East Route. All projects are on rail infrastructure in Kent and Sussex, throughout Control Period 5 (five-year framework), including emergency response works. Projects are carried out from concept and feasibility, through construction phase and final hand back including stakeholder interface. Individual projects in the framework vary in value from £50k to a maximum of £40m, with over 300 projects in the 5 years.

Civils

Supply of fully equipped civils gangs installing route works, concrete bases, hard standings, UTX's, Loc bases, TP Huts bases along the routes

Safety Critical
