Description of resource and intended audience:

This tool is intended to support teachers and students to assess and reflect on students' academic oral language production and writing progress over the course of a unit. It focuses teachers' attention on the dimensions of academic language development and allows the documenting of progress throughout a unit. This assessment tool should be used with several activities in a unit so students have opportunities to write for different audiences and purposes and to interact with each other and the teacher in multiple ways. Teacher modeling, small group work, pair-share-think-share activities, and class presentations are effective strategies to collect assessment information.

Materials needed: Student writing

Approximate time needed: This assessment tool can be used as an assessment routine throughout a unit.

Instructions:

1. Teachers assign an oral language or writing assignment and use the first part of the rubric to analyze students language production and circle areas in which to focus improvement. Teacher uses this information to plan teaching and learning activities to support improvement in language and content knowledge, including scaffolding strategies that focus on areas of need.
2. Teachers explain students' strengths and areas for improvement in student conference. Together, students and teacher use the second part of the rubric to set improvement goals for writing or oral language production.
3. Teachers and students revisit and assess the goals and progress after each planned activity in which students are producing oral or written language.
4. Teachers use the assessment of progress rubric to plan scaffolds for academic language development.
5. Teachers and students discuss overall development and discuss new goals for the next unit of study.

See Rubric for Teachers on Page 2 and Rubric for Students on Page 3.
