

# Childhood Vaccination Workflow: Proactive Outreach

Identify Children in Need of Vaccinations

Run Pursuit List through your EHR or IIS\* to create a list of patients due for one or more vaccinations.

Parent/caregiver DOES NOT have active Patient Portal access

Send immunization reminder ([Infants & Children](#) or [Preteens & Teens](#)) through mail, email, text or IVR.

Parent/caregiver DOES have active Patient Portal access

Send immunization reminder through Patient Portal.

Parent/caregiver books appointment

Parent/caregiver books appointment

Parent/caregiver DOES NOT book appointment

Send additional reminder and call parent/caregiver.

Parent/caregiver DOES NOT book appointment.

Make note in chart to discuss immunizations with parent/caregiver during next office visit.

\*Immunization Information Systems (IIS), also known as immunization registries, may also be used to generate patient lists and immunization reminders/recalls. Learn more about the benefits of IIS and how to participate in your state's IIS by visiting [Making IIS Work for You](#) on the Let's Vaccinate website.

*During flu season, you may want to consider sending out a reminder about the importance of getting a flu shot to all patients 6 months and older.*
