Adult Vaccination Workflow: During Office Visit

Patient completes vaccine questionnaire at appointment.

Medical Assistant (MA) reviews order module and medicine reconciliation.

MA completes vaccine history review protocols, and executes standing orders.

Patient is due for vaccine and consents
- Print and give patient VIS.
- Administer vaccination.
- Document vaccination, and bill per protocol.

Patient is due for vaccine but does NOT consent
- Task / alert provider.
- Provider discusses benefits and risks with patient.
- Patient DOES NOT consent
  - Document and set reminder and provide patient with educational materials.

Patient is NOT due for vaccine
- Document and set 6-month reminder.
