

Identifying Similarities and Differences

This type of exercise involves both critical and creative thinking. Pupils will apply logical reasoning as they define their associations and engage in analysis as they break whole things up into component parts or attributes. An essential aspect of understanding is how we draw boundaries between different ideas. Distinctions are used to challenge definitions and labels.

Making Judgements
Ranking items to create meaning and develop new perspectives.

1 What are the most important human traits?

Comparing Two Things
Systematically comparing the attributes of two items.

2 How are Tigers and Lions Similar?
