

WELCOME TO THE UNRULIEST HOUR OF CODE™^EVER

ONE HOUR. ONE QUEST.

An hour of coding is like a minute to eat dessert—not enough time, but a treat nonetheless!

This Hour of Code, we are giving you everything you need to incorporate some Unruly active play in your classes, whether you are virtual, hybrid, or in person!

HOW DOES IT WORK?

The quest includes a quick intro to our app, two simple but highly useful programs, and a game to tie them all together! All in one slide deck to use with your class in-person or remotely. No Splats, no problem. By the end of the journey, students will have created their own, very Unruly, program!

HOW DO I PARTICIPATE?

OPTION 1 - Full Quest: [Contact a Splats Specialist](#) to become an Unruly member and get access to the full quest (including raffle entries, pie kit, and student prizes)!

OPTION 2 - Trial Quest: Email splatspecialists@unruly-studios.com to request a free trial of our app and download the basic quest [here](#). Everything you need is in that slide deck!

"Unruly Studios Hour of Code 2020 changed my life. Before, my kids didn't know how to code, and I had horrible skin. Now, we're programming robots in our free time, and pie moisturizer is an essential part of my daily routine. Thanks, Splats!" —Time Traveling Teacher
