

Safety Valve Protection Sleeve (SVPS)

Impact Selector's Safety Valve Protection Sleeve

(SVPS) protects seal bore surfaces within safety valves during well intervention. The SVPS also prevents the flapper from closing on the wireline. Our SVPS have been deployed globally for over a decade. With over 200 sleeve designs available for three sleeve types, Impact Selector can provide an SVPS to suit any application or safety valve.

Features

- ▶ Large ID
- ▶ Manufactured to suit customer requirements

Benefits

- ▶ Protects seal bores from intervention wear
- ▶ Prevents accidental closing of safety valve on wireline
- ▶ Simple deployment and retrieval

Collet Protection Sleeve

- ▶ Additional advantage of snap-in collet fingers while providing maximum through bore.

Lock-in Sleeve

- ▶ Designed to locate in position with a no-go.
- ▶ Incorporates positive engagement collet fingers to hold securely in position.

Drop Off Sleeve

- ▶ Conveyed by incorporating a specific running tool in the intervention tool string.
- ▶ Allows Protection Sleeve to be located and retrieved during a single run.
- ▶ Saves time, reduces risk by eliminating additional trips in hole.
- ▶ Can run on E-line applications.
