

# KBHCCD GREEN INITIATIVES

The Kay Bailey Hutchison Convention Center Dallas (KBHCCD) is committed to supporting and encouraging sustainable practices. We are dedicated to resource conservation, sustainability, source reduction and waste diversion. We pride ourselves in working with clients to host environmentally-friendly meetings and offering “green” practices, when possible. The KBHCCD works with our building partners, industry leaders and our community by identifying opportunities to reduce our carbon footprint, as we work together towards a more sustainable future.

## GREEN PRACTICES

### WATER

- Our maintenance and housekeeping staffs are trained to detect and report leaks for immediate repairs to conserve water.

### GREEN PURCHASES

- We purchase and use environmentally friendly cleaning products, which in turn contribute to cleaner effluent.

### ELECTRICITY

- High-speed dock doors mean efficient temperature control inside exhibit halls.
- High efficiency motors were installed throughout the HVAC system replacing old high energy consuming motors.

### RECYCLING

- We offer free recycling collection which helps to offset show and exhibitor costs for garbage collection.
- Paper, cardboard and metals are collected and recycled on a consistent basis.
- More than 7.6 tons of unconsumed food and consumer products from shows has been donated through our Good Neighbor Program to seven nonprofits serving homeless and at-risk people in Downtown Dallas.
- All used cooking oil is collected for conversion to bio-diesel.
- Our catering partner uses compostable utensils for all disposable applications.

If you're looking to host a more sustainable event, please speak with your Event Manager/Coordinator about how we can help you achieve your green goals.
