Notification of Work on behalf of Milton Keynes Council to be carried out at Emberton Country Park – Thursday 24 March to Friday 25th March 2022

Work will be undertaken on Thursday 24 March and Friday 25 March to remove 29 large poplar trees within Emberton Country Park along the border of the A509. Several other poplars will have a significant cut to them close to this location.

The trees are being removed for health and safety purposes only. They have been surveyed by tree experts for Milton Keynes Council and this was the recommendation.

A re-planting plan will be finalised after the trees are removed. The plan will factor in a spectrum of native species.

Traffic management and pedestrian plans will be in place from 9.30am – 3.30pm. One road lane closure in place with traffic lights.

Pedestrian gates in the location of the works will be closed. There will be up to four staff on site to help pedestrians. Signage will be in place. When working on the roadside poplars the footpath next to the road will be closed. A route for entry will be open at the side of the park in the corner with a detour for pedestrians around the lake away from the working site.

Once the roadside poplars are complete the footpath along the road will be open, but the side entrance will be closed off whilst the reduction work is undertaken in the corner.
