

**SOLUTION SHEET****Enable Remote Work Faster****Windows Virtual Desktop (WVD)  
by Opticca****Windows Virtual Desktop  
is right for you if:**

- > You want your users to be able to run the apps they need from anywhere there's an internet connection, and from any web-enabled device
- > You want to eliminate high overhead associated with managing on-premise infrastructure
- > You want your users to get the same satisfyingly familiar experience of using Windows like they would back in the office
- > You want to benefit from Azure's long-established, industry-leading security for cloud data
- > You want the infrastructure behind connecting to your virtual desktops and configuring your virtual desktop environment, to be taken care of for you

**Now is the ideal time to deliver an environment that works with your employees' new reality and allows them to work anywhere at any time.**

We recognize that the current global climate demands a new approach to enabling your employees and your business. As more employees work off site, transition between home and work offices, or access their work from multiple devices, legacy applications can't always keep up.

Empower your people to be more productive from any location, on their favorite device, with Windows Virtual Desktop (WVD) by Opticca.

WVD is a comprehensive desktop and app virtualization service running on the Microsoft® Azure® cloud.

- > WVD provides your users with a full native Windows experience and the productivity and business intelligent tools that they already know and love
- > WVD works across any devices, and from any location with an internet connection
- > WVD users log in to access their desktop environment, no user VPN required, no complex PKI required, and no RDS CALs required.

Our team of experts will help you design, configure and deploy your virtual desktops to meet the needs of your business and use cases.

Quickly realize the benefits of virtual desktops to support remote employees, without incurring the costs or risks associated with building legacy VDI solutions internally.

**Reduce costs**

Unlike traditional VDIs, there's zero upfront CapEx, and because OpEx spend is aligned to your business usage, your ongoing costs are significantly reduced.

**Deploy & scale  
in minutes**

Since WVD runs on Azure, you can quickly provision and scale virtual desktops & applications faster than was previously possible.

**Increase security**

Your apps, desktops, and data are all kept centrally in Azure Cloud, and never brought into your user's device.

**Enhance employee  
efficiency**

Your users get the same look & feel every time they connect to a desktop or app, and with super-fast login times.

Secure access  
from any device

Centralized management  
and control

On-demand scalability &  
flexibility

## Target Business Outcomes

If you can relate to the following, **Windows Virtual Desktop (WVD) by Opticca** can be a game changer for your business:

1. Deliver the same great user experience as existing VDI solutions at a much lower cost
2. Flexibility to work remotely using any end-user device
3. OS, applications, and data reside on cloud servers, not user devices
4. Increased productivity with a consistent user experience
5. Instant provisioning and high scalability up & down
6. Enhanced security capabilities, already built in
7. Less labor and time required to manage both VDI and session host deployments
8. Use your Microsoft 365 or qualifying Windows 10 licenses and deploy WVD with no additional licensing costs
9. WVD provides more flexibility to optimize your users for performance or cost management.

## WVD by Opticca Package Details

Give your employees the freedom to work anywhere:

- > Phase 1
  - > Discovery of your current environment
  - > Prerequisite check and gap analysis report
- > Phase 2
  - > Design of WVD environment for each region
  - > Implementation of WVD environment
  - > End-User Testing and Performance Benchmark
  - > Fine Tuning/Automation (ARM Templates/Run Book)
- > **Optimal for 100 users & above (custom pricing available for <100)**
- > **Fixed bid offer**
- > **Available funding & financing**
- > **Delivered within 5 weeks**
- > Deliverables
  - > Kick-off meeting
  - > Review your Azure environment and finalize project scope
  - > Create Azure resources for WVD POC components
  - > Link your Active Directory to Azure Active Directory with AD Connect
  - > Create WVD user groups, service principal, and administrator
  - > Establish a Windows Virtual Desktop Tenant in Azure
  - > Build a personalized Tenant Group of load-balanced session-host servers
  - > Create an Azure Files share for secure roaming user profile storage
  - > Integrate an FSLogix profile container for persistent desktops
  - > Demonstrate diagnostics and monitoring activities

Partner with Us

Opticca is a hybrid, multi-cloud service provider that accelerates IT transformation for thousands of growing and established global brands. Through our deep technical knowledge and strategic relationships with the world's leading cloud providers, proven delivery methodologies, platform-agnostic approach and onshore network of highly specialized experts, we provide the capabilities and practical guidance customers need to successfully embrace IT change and move their businesses forward.
