FleetMobile™

Smartphone Standalone Edition (SSE)

With the best-in-class smartphone GPS tracking, tracking the location of your drivers has never been easier. And it's not just live GPS tracking on a map, the Azuga app can also detect driving behavior like speeding, harsh braking and rapid acceleration. Advanced data science and machine learning techniques drive competition between drivers, coach them to safer outcomes and reduce risk. Precise location and timestamps for timecards submitted directly from the phone eliminate unnecessary paperwork and reduces overtime fraud.

No need for a separate GPS hardware unit for your vehicles. Use your existing Android and iOS smartphone to see all of your drivers on live maps. Inspect breadcrumb trails. Check stop locations and times.

Insurers can now deploy Fleet UBI without expensive investment or device subsidies. Leverage Azuga's Data Science team and driver scores that have been vetted by leading insurance companies.

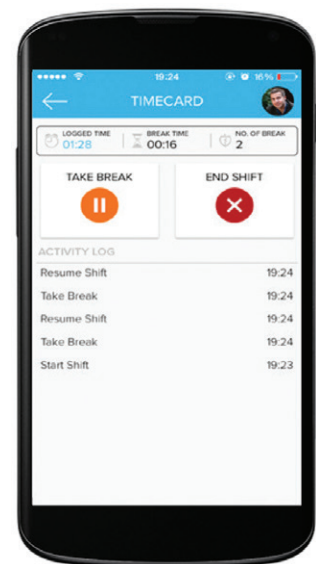

Benefit from continuous investment in the roadmap to more advanced workforce management in 2018 with job dispatch, customizable inspection forms and more. All this with Azuga's best in class customer support.

And when you're ready for vehicle diagnostics (DTCs), fuel consumed and battery health, you'll have an easy upgrade path to plug-n-play hardware that fits into the vehicle's OBD or JBUS port.

Accurate and cost-effective smartphone tracking, driver behavior monitoring, gamification and mobile timecards

Azuga FleetMobile SSE is loaded with enterprise features

- Live maps & breadcrumbs
- Driver grouping & hierarchies
- Trip details & trip detection
- Stop time & number of stops
- Usage summary
- Geofences
- Scheduled reports
- Custom reporting
- Driver coaching

No Hardware Costs | No installation Costs
