

# Unlock the power of your benefits data.

---

Artemis Health offers a holistic view of your benefits, fast answers, a true partnership, and an action plan.

# What makes Artemis different?

## Ease of Use

Whether you're a novice or seasoned analyst, you can find fast answers to tough questions.

## Tech-Enabled Services

Our modern tech gives you a lift with specially built tools that evolve quickly.

## Fast & Flexible Reporting

Stop waiting—have accurate answers at your fingertips so you never have to say, “I don't know.”

## Data Stays in the U.S.

Your data is never off-shored and always secure.

## Made for Benefits

Join a community of innovators, stay on top of trends, and help drive the future of benefits in the U.S.

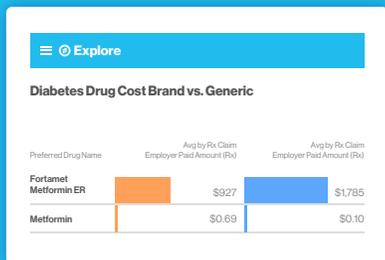

## A Holistic View

Connect all your benefits partners to find insights that impact employee engagement and satisfaction.

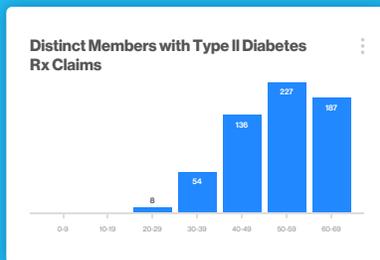

**Your employees are counting on you to provide  
the best benefits possible—let us help.**

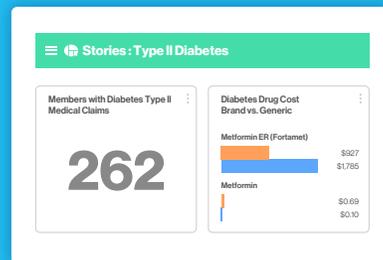

## Identify Opportunities

Get timely answers to help you plan ahead.

## Build Business Cases

Make the case for your benefits strategy.

## Measure Results

Find out what's working (and what's not), and work with your team to do something about it.

## We think you'll love:

**01 Standard Stories**

**02 Actionable Overspending**

**03 Trend Explorer**

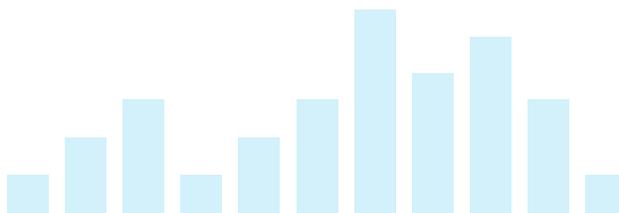

**04 Benchmarks**

**05 Custom Stories**

**06 Explore**

**07 Gaps in Care**

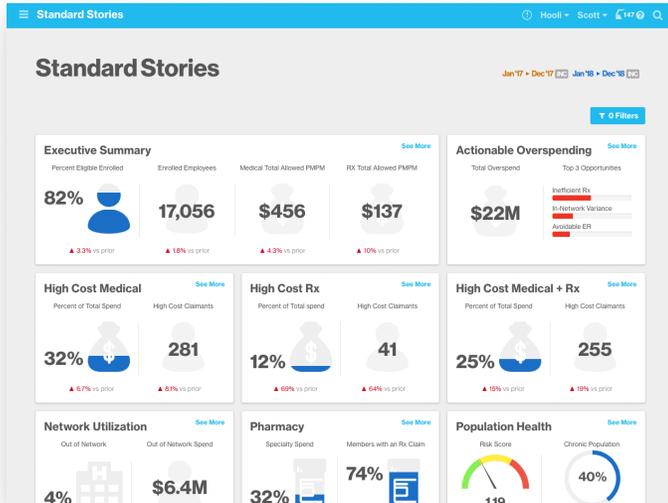

**08 Cohorts**

[Take a look →](#)

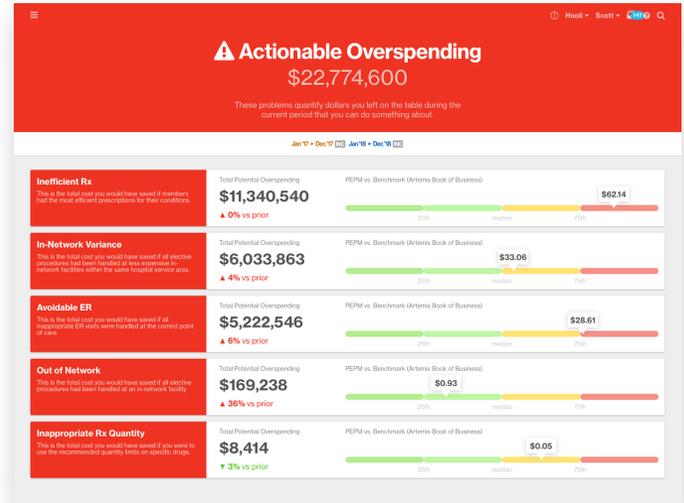

# 01 Standard Stories

The Standard Stories app offers out-of-the-box reports to answer your most common benefits questions, all in an easy-to-use format.

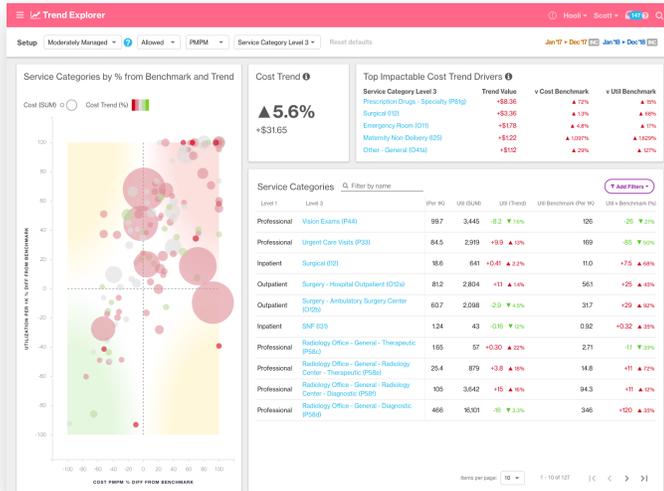

# 02 Actionable Overspending

This app showcases common areas of overspending and gives you the data you need to take action.

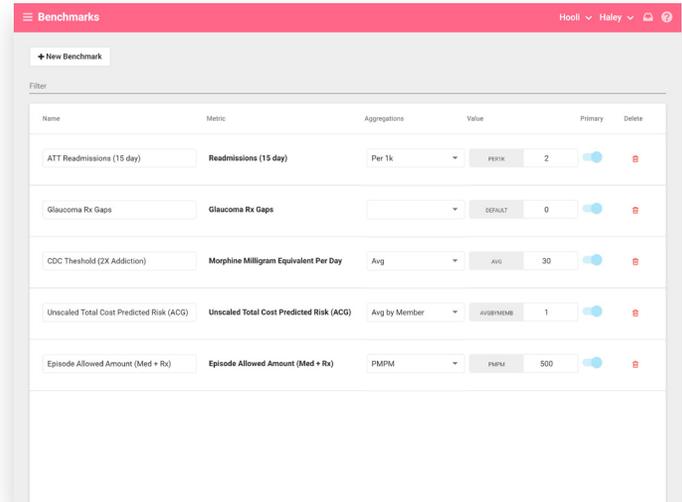

## 03 Trend Explorer

This feature instantly shows how your benefit plans are performing compared to benchmarks so you can focus on impactful action.

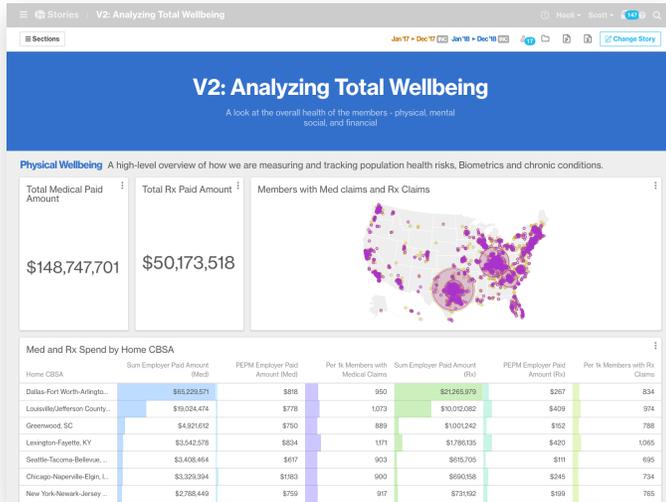

## 04 Benchmarks

We use Milliman Health Cost Guidelines (HCG) to benchmark cost and utilization data by service categories, plus you can compare your Actionable Overspending to other Artemis clients.

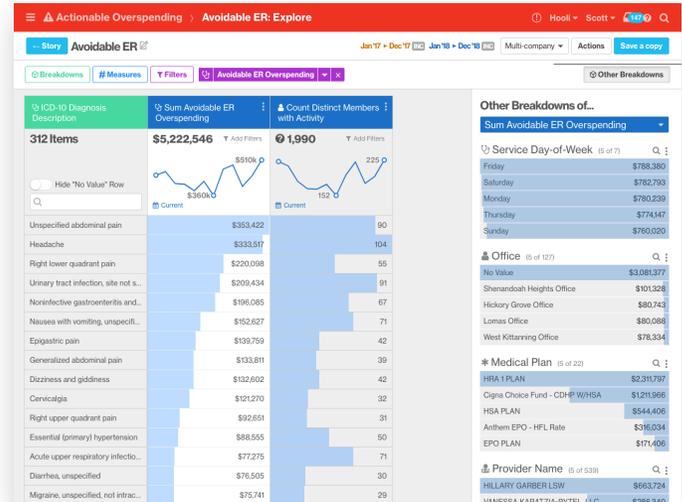

## 05 Custom Stories

See custom, in-depth reports with the Stories app and share your insights with clear visualizations.

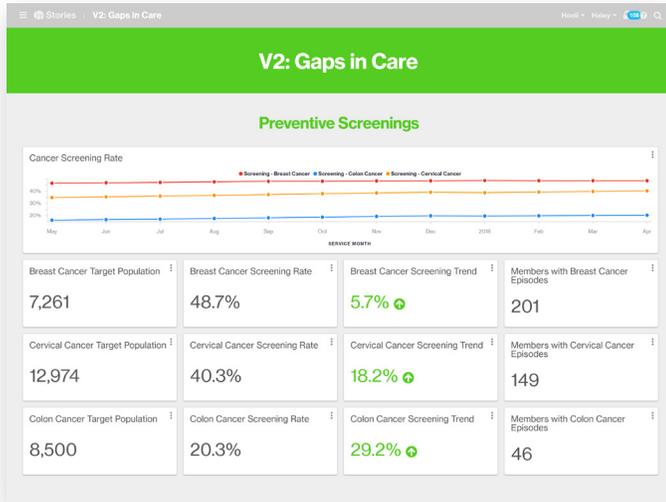

## 06 Explore

This deep analysis tool allows you or your trusted advisor to slice and dice your benefits data and get an in-depth view.

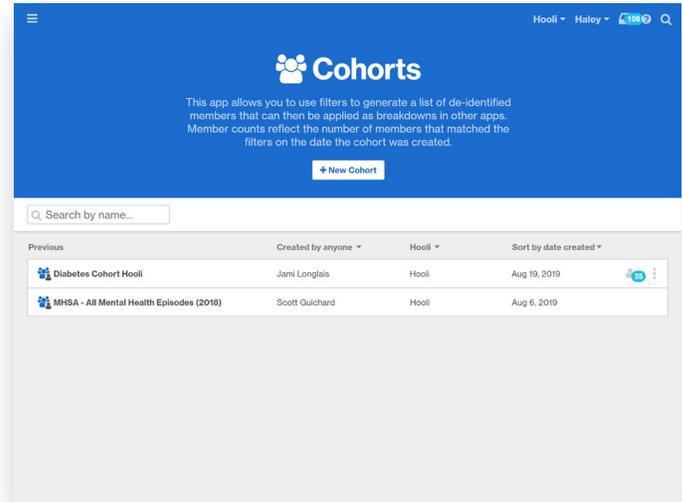

## 07 Gaps in Care

Measure your healthcare performance, find areas for improvement, and improve the lives of members with condition management, preventive health, and more.

## 08 Cohorts

Quickly segment population groups based on any information in the system to monitor their behavior and outcomes over time.

## Example:

# Work With Providers For Better Member Care

Here's how Artemis client Mohawk Industries is unlocking the power of their benefits data:

- Using Cohorts functionality to track members with multiple chronic conditions.
- Sharing data with primary care physicians at company onsite clinics.
- Rolling out targeted communications to these members.
- Coordinating preventive care and condition management programs through clinicians.
- Monitoring outcomes within Artemis.

Case Study

# Collaborating with Clinicians for Better Chronic Condition Management

Chronic conditions like diabetes, asthma, hypertension, and others are among the most expensive to manage for both patients and self-insured employers. In this case study, we'll explore how data helped Mohawk Industries, Inc. better equip clinical experts to offer high-quality care to these members.

*Mohawk Industries, Inc. is the world's largest flooring company, with over 32,000 members enrolled in their U.S. benefits plan. They are headquartered in Calhoun, Georgia and manufacture flooring products in 19 countries.*

*Mohawk wanted to better connect their benefits data to their clinical resources, which includes on-site, near-site and virtual clinics. With the help of Artemis Health Analytic Advisors, they focused on a group of anonymous members: those with chronic conditions.*

## The analysis.

Artemis and Mohawk worked together to create "cohorts" (member groupings) with diagnoses for thirteen common chronic conditions. We compared medical claims and prescription data to determine which members met our criteria. The team then utilized the Artemis Platform to build a heatmap of members with five, four, three, two or one of the chronic conditions.

Additionally, we created a cohort of healthy members without chronic condition diagnoses.

“I think that benefit leaders need to put an absolute priority on the data. Without a holistic view of their data, they are left with their opinions. If I’m talking with someone in my organization, and all I have is my opinion, their opinion tends to win out. If I’ve got the data to support my opinions, I’m on a much more solid piece of ground.”

**Jake Flaitz**

*Director of Benefits at Paychex*

“I like that Artemis is dynamic and growing. Many benefits data vendors have become rigid and I like that Artemis truly has a culture of growth, transparency, and true teamwork.”

**Tara Colussi**

*Senior Analytic Advisor at Artemis Health*
