

## Project Execution Earns AdvanceTEC Design-Build Process Integration Addition

*Confidential segment-leading semiconductor capital equipment client increases AdvanceTEC design-build role to include mission critical high-purity utility generation and process waste abatement systems*

**Richmond, VA, July 9, 2018** – AdvanceTEC, a leader in cleanroom design, construction and process integration, today announced a significant increase of its recently announced design-build contract serving a global semiconductor equipment segment leader. The contract now includes engineering, design, 3D BIM modeling & coordination, furnish, installation, start-up, commissioning and training for mission critical high-purity process utility generation and waste abatement systems. This change marks a meaningful increase in AdvanceTEC's scope of responsibility on this fast-track project.

According to Bryan Phelan, AdvanceTEC managing partner and director of sales, marketing and preconstruction services, "The decision to expand AdvanceTEC's role in this critical project was based on the execution of our team to date, and the trust and confidence that we have earned as a result. At the end of the day, it's all about turning over the facility for the client's business plans on time, on budget, and to specification – and our increased role on the project is a clear illustration that we are well suited to achieve that.

As a part of the expanded contract, AdvanceTEC was awarded engineering, design, 3D BIM modeling & coordination / furnish, installation, start-up, commissioning, training on mission critical high-purity process utility generation & waste abatement systems.

### **About AdvanceTEC**

AdvanceTEC is a leader in cleanroom design, cleanroom construction and process integration serving clients in the Nanotechnology, Microelectronics, Pharmaceutical and Biotechnology industries. Since its founding in 2000, AdvanceTEC has successfully constructed facilities for research, pilot production and high-volume manufacturing applications. The company works with leading technology companies, construction managers, architectural engineering firms, lab planners and developers to estimate, value engineer, design and construct state-of-the-art cleanrooms. Its expertise is turn-key design/build projects, where performance, schedule, and safety are critical. For more information, please visit [www.AdvanceTECLLC.com](http://www.AdvanceTECLLC.com).
