

AdvanceTEC Contracted for Turn-key Design Build Cleanroom and Mission Critical Process Distribution for Advanced Semiconductor Facility

Confidential segment-leading semiconductor capital equipment client endorses AdvanceTEC selection by respected multi-national construction management firm for fast track cleantech project

Richmond, VA, May 8, 2018 – AdvanceTEC, a leader in cleanroom design, construction and process integration, today announced that it has been awarded the turn-key design build services for cleanroom and mission critical process distribution for a global semiconductor equipment segment leader. AdvanceTEC has been contracted by the design-build Construction Manager, with direct review and approval from the client. Total investment in the overall project is reported to be in excess of \$200 million. In addition to the turn-key design build of the cleanroom proper, AdvanceTEC will provide ultra-high purity process distribution and integration, including ultra-pure water distribution, chemical distribution, and waste abatement.

AdvanceTEC was selected for this project in part due to their experience in nanotechnology and poly silicon processing, as well as their track record of success working with project's Construction Manager. AdvanceTEC also demonstrated industry leading engineering and design capabilities, including advanced BIM modeling technologies and experienced in-house resources.

“AdvanceTEC is honored to be selected for this confidential fast-track project,” noted Bryan Phelan, AdvanceTEC managing partner and director of sales, marketing and preconstruction services. “This project is right up our alley. It is exciting when we can add value for our clients by leveraging the capabilities and experience that really differentiate AdvanceTEC – 3D BIM Modeling, sophisticated HVAC mechanical, process integration, and the strength of our Field Team. A project award on such a coveted project like this validates our investments in our people and technology platforms.”

Currently, AdvanceTEC is completing design with construction initiating in the coming weeks.

About AdvanceTEC

AdvanceTEC is a leader in cleanroom design, cleanroom construction and process integration serving clients in the Nanotechnology, Microelectronics, Pharmaceutical and Biotechnology industries. Since its founding in 2000, AdvanceTEC has successfully constructed facilities for research, pilot production and high-volume manufacturing applications. The company works with leading technology companies, construction managers, architectural engineering firms, lab planners and developers to estimate, value engineer, design and construct state-of-the-art cleanrooms. Its expertise is turn-key design/build projects, where performance, schedule, and safety are critical. For more information, please visit www.AdvanceTECLLC.com.
