

AdvanceTEC Named to ENR's Top 600 Specialty Contractors

Award reflects AdvanceTEC's continued growth and execution

Richmond, VA, February 5, 2013 – AdvanceTEC, a leader in cleanroom design and construction, today announced that it has been named to Engineering News-Record's (ENR) 2012 Top 600 Specialty Contractors listing. The award recognizes AdvanceTEC based on 2011 annual cleanroom construction revenues in the United States.

“AdvanceTEC is proud to once again be included in ENR's prestigious Top 600 Specialty Contractors list,” noted Bryan Phelan, AdvanceTEC managing partner and director of sales, marketing and preconstruction services. “While others watch and wait for the recovery, AdvanceTEC is moving forward, climbing more than 75 positions in the ENR listing. This success is driven in large part by our repeat and referral business, and the commitment of our team to listen to our customers and serve their needs.”

Phelan continued, “Our continuous focus is to listen to our clients and provide solutions and value to their projects and business objectives. We are continuing to expand our capabilities in nanotechnology and pharmaceutical markets, increasing our process system infrastructure and installation capabilities. Our client base continues to seek a more integrated project delivery model and aligning process purity piping and complex mechanical systems ties very well with our in-house engineering and design capabilities.”

The ENR Top 600 Specialty Contractor list is compiled as a part of its efforts to connect diverse sectors of the industry with coverage that everyone needs about issues such as business management, design, construction methods, technology, safety, law, legislation, environment and labor.
