STEELS

Raybestos® Powertrain steel clutch plates: high-quality, application-engineered products at an affordable price.

Manufactured with attention to critical tolerances and quality control, our made-in-the-USA steel plates meet or exceed OE specifications to provide a flawless fit without binding. Raybestos Powertrain steel plates provide a superior surface finish with a greater apply area, increased friction clutch life and maximum heat sink. With better shift performance and clutch durability – plus lower noise and shudder – Raybestos Powertrain steel plates extend the life of your transmission.

RECOMMENDED USE:

All automatic transmission rebuilds.
