

High Efficiency Filter

Ideal to retrofit ineffective baffle or honeycomb filters the micron filter is the ultimate high efficiency primary grease filter for your kitchen. The filters are proven to remove 94.6% of grease before it enters the extraction system. The filters are available in standard sizes.

Benefits include:

- Reduces duct cleaning requirements
- Simply wash them in your dishwasher
- Exceptional fire barrier
- Reduce insurance premiums
- Grease capture 94.6%
- Return on investment is as short as 12 months
- UL 1046 & UDI2052 accredited

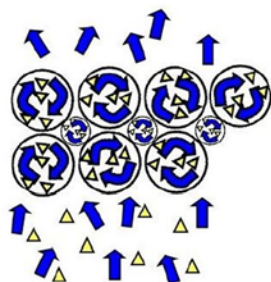

Specification:

- Volume Flow Rate (m³/s): up to 0.56 per filter
- Face Velocity (m/s): 4.2 (optimal)
- Pressure Drop (pa): 85
- Weight (kg): up to 3kg
- Material: Stainless Steel
- Noise (dB): 50

How does it work?

The patented Veritech cartridge filter is designed to apply the four main principles of effective grease filtration, namely:

- Condensation
- Inertial separation
- Impingement
- Settling,

- * Air and Grease go into the Veritech filter
- * Air and Grease circulate around the coils within the filter
- * 94.9% of Grease is trapped and collected in the drip tray
- * Cleansed air comes out of the back of the Veritech Filter
