STRONGWALL & STRONGFENCE INSTALLATION GUIDE

INSTALLATION INSTRUCTIONS

Check bases, StrongWall tops & metal StrongFence tops for signs of damage before and after use. Damaged goods should not be used.
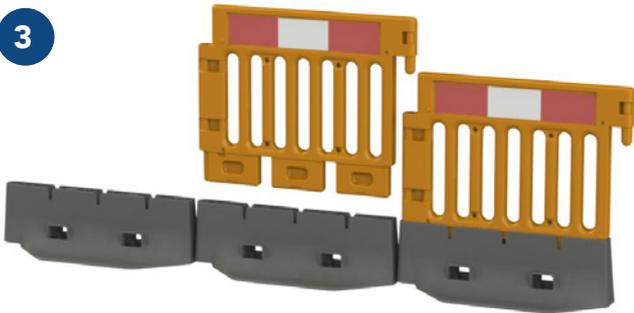

1

Ensure that the side marked "FRONT" is traffic-facing.

2

Place the bases next to one another.

3

Ensure the side marked "FRONT" is traffic-facing, then Insert the first StrongWall top into the base.

4

Insert the next StrongWall top so that the connecting pin slots into the locater hole of the previous base.

5

Insert the metal StrongFence top into the StrongWall. Ensure the StrongFence top is pushed down as far as possible.

6

Once installed connect the StrongFence tops together using standard metal fence clamps.

7

Deploy StrongFence at a right angle for stability.

8

For wind speeds over 40mph brace the barrier configuration with 1 StrongFence for every 5, connected via a fence clamp.
