

3M Science.
Applied to Life.™

**Keeping your workers
safe with 3M™ Road
Work Safety Solutions.**

In pursuit of zero deaths.

Want Diamond Grade safety and visibility to save lives in your work zones?

Positive guidance is enhanced when these 3M™ high performing reflective materials are used:

✓ 1. Full-Cube Technology

Early-recognition brightness.

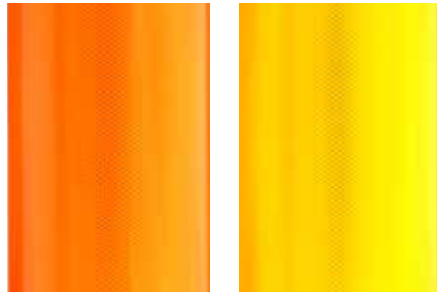

At nearly twice the brightness of conventional prismatic sheeting, the full-cube technology in 3M™ Diamond Grade™ DG³ Reflective Sheeting attracts drivers' attention sooner to improve comprehension and response times.

✓ 2. Colour Fluorescence

Around-the-clock visibility.

Regardless of available light, highly-conspicuous fluorescent material(s) are recognised at greater distances with more accurate colour perception than nonfluorescent coloured products.²

✓ 3. Wet Reflectivity

All-weather performance.

Wet reflective pavement markings provide highly visible lane delineation even in poor weather. Simple to apply and remove, these durable solutions last through a normal construction season.

Safety and Mobility, brought to life through:

Bright rigid signs:

- > **Maximum reflected light:**
3M Diamond Grade™ DG³ Fluorescent Reflective Sheeting Series 4080 (Best)
- > **Intermediate to high reflectivity:**
3M High Intensity Prismatic Series 3800 (Better)

High visibility and durable cones, bollards and barriers:

- > 3M Flexible Prismatic Sheeting Series 3300

High visibility vehicle markings:

- > 3M Diamond Grade™ Series 983

Reflective Pavement Markings:

- > 3M Stamark™ Wet Reflective Removable Pavement Marking Tapes Series 710

Like you, we aspire to a world free of roadway fatalities

It's why we have partnered with:

- > The Safer Australian Roads and Highways (SARAH) Group.
- > 3M is committed to supporting the United Nation's DECADE OF ACTION FOR ROAD SAFETY 2011 - 2020

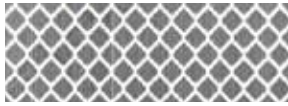

Together We can
save millions
of lives.

2. Evaluation of Fluorescent Orange Signs, Texas Transportation Institute, TDOT, TX-00/2962-S, 2000.

Maximum total reflected light.

3M™ Diamond Grade™ DG³ Reflective Sheeting Series 4000

- > Best performance in short, medium and long viewing distances with 3M full cube technology.
- > Best performance and visibility to alert drivers of upcoming road work zones.
- > Upgrade to DG³ Fluorescent colours for extra visibility in daylight and twilight hours giving 24/7 visibility.
- > Optimal performance in the most challenging environments, where and when drivers need it most.

4090 - White

4081 - Fluorescent Yellow

4084 - Fluorescent Orange

Intermediate reflectivity.

3M™ High Intensity Prismatic Sheeting Series 3800

- > Medium to high performance and visibility to alert drivers of upcoming road work zones.
- > Withstands tough weather conditions.

3830 - White

3831 - Yellow

3824 - Fluorescent Orange

3M Stamark™ Removable Pavement Marking Tapes

- > Quick and easy to apply for temporary applications.
- > Highly reflective and skid resistant in wet and dry conditions.
- > Will not damage or scar road surface when removed.
- > Available in black to temporarily cover existing markings.
- > Suggested by RMS as the preferred method of temporary road marking for arterial roads, work zones and construction.

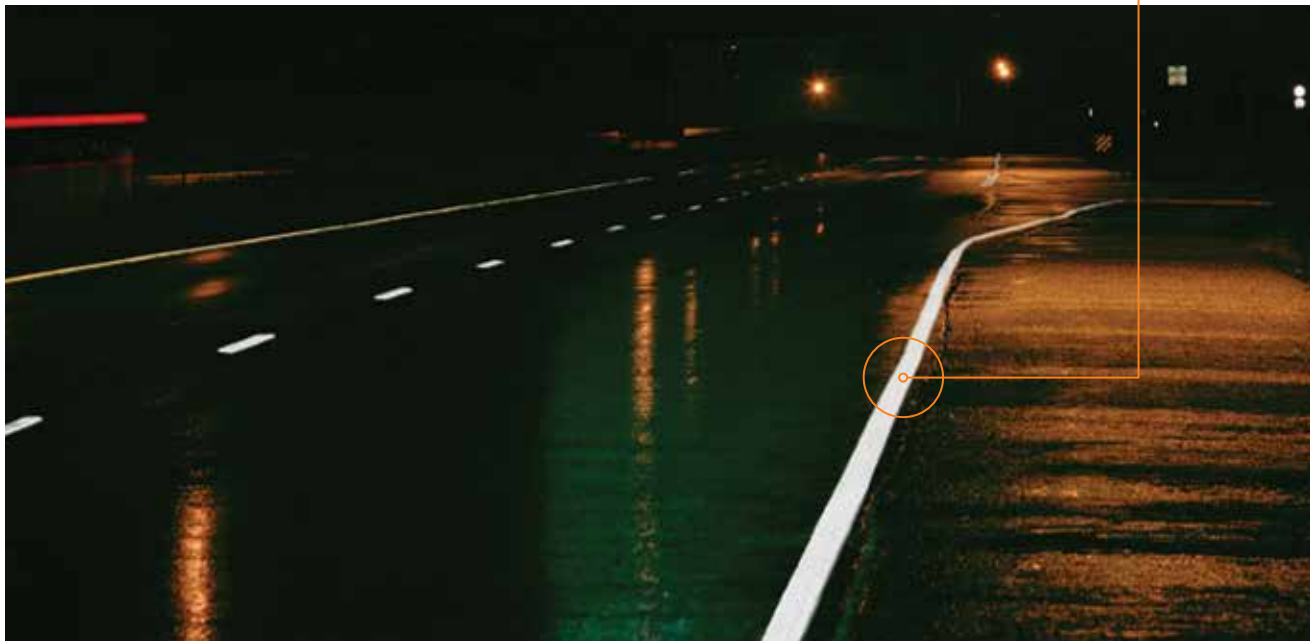

710 - White

711 - Yellow

715 - Black
