

ETON SHIRTS

Eton Shirts is a manufacturer of premium quality shirts. Founded in 1928 in Sweden, the company is currently one of the leaders in its sector, with stores in 49 countries, including the most exclusive department stores in the world.

PROJECT TASKS UNDERTAKEN

- Technical specification documentation
- Software development
- Code package testing
- Performance analysis and optimisation of migration process
- D365 testing in accordance with provided specification
- Development of interfaces and integrations for external systems

ETON

Client

Eton Shirts

Industry

Manufacturing

Organisation size

200-500 employees

Country

Sweden

Product

Microsoft Dynamics 365 for
Finance and Operations

PROJECT DESCRIPTION

The Microsoft Dynamics 365 for Finance and Operations project focused on software development and improvement of standard application functionality.

As part of the project, the ANEGIS team improved the data structure to integrate Dynamics 365 with the Azure SQL database (BYOD) and OData protocol; automated the creation of inter-company sales orders for different warehouse rules; and built a tool to manage the flow logs from consignment orders and E-com.

A mechanism was also developed to report changes in available inventory and attribute value of goods, as well as non-standard graphic layouts for key reports using an external K3 Software Fashion module.
