PHONE

Dear Valued Client,

The U.S Department of State and U.S. Department of Commerce have issued statements that the United States will end exports of U.S. origin defense equipment to Hong Kong. The U.S. will also take steps towards imposing the same restrictions on U.S. defense and dual-use technologies as it does for China. Preferential treatment to Hong Kong (including the availability of export license exceptions) are suspended. Further action to eliminate differential treatment is also being evaluated.
