Re: Regulatory Requirement for non-surgical/medical masks from China

Dear Valued Client,

China has implemented as of April 26, 2020 new regulatory requirements for exports of non-surgical/medical masks exported for non-medical use.

1. If the Chinese manufacturer is on an approved list, both the importer and exporter must complete a joint declaration.
2. If the Chinese manufacturer is not on an approved list both the importer and exporter must complete a joint declaration and wait for export approval.
3. If the Chinese manufacturer is on a “black-list” the export is forbidden.

For manufacturers on the approved list, see link below:

<http://www.cccmhpie.org.cn/Pub/6325/176185.shtml>

To review an example of the joint declaration, please click the document below:
