

All major US, European, and Regional Carriers operate directly out of Dubai to American and European destinations, making it an ideal Hub for a unique cost savings advantage. The DXB and DWC cargo terminals and the JEA sea ports are designed and equipped to meet the needs of specific Sea Air products by combining the best features of air and sea services.

The Sea Air acceptance docks have the capacity to turnover in excess of 35 to 40 tons per hour.

JAS is committed to providing a high quality of services and competitive rates. Today, our global network encompasses over 100 countries between JAS offices and official agents, and has over 5,000 employees globally.

BENEFITS:

- Lower cost option to air freight
- Faster transit times than ocean freight
- Reduced lead times
- Comparatively lower CO2 emissions

IDEAL FOR CLIENTS WHO SHIP:

- E-goods
- Mid-fashion goods
- Retail goods
- Controlled transport
- Automotive from areas where uplift is scarce
