

## Healthcare IT Services Leader Joins MediQuant Board of Directors

**BRECKSVILLE, OH – March 30, 2021** – MediQuant, the leading innovator and provider of enterprise active archiving solutions to hospitals and health systems, announced the addition of Bruce Cerullo as a member of its board of directors.

“We’re pleased to formalize our relationship with Bruce at MediQuant. Bruce has always been dedicated to providing leading solutions that build stronger healthcare systems,” said MediQuant CEO Jim Jacobs. “Whether on a board or as a chief executive, Bruce has been integral to transforming and growing companies like ours that provide innovative solutions to healthcare providers.”

Cerullo has more than 35 years of leadership experience in the healthcare industry as the CEO and chair of the board at a variety of healthcare consulting and staffing companies. In addition to joining the MediQuant Board of Directors, he currently serves as the Board Chair of Nordic Consulting Partners, an award-winning health IT staffing, consulting, and managed services firm.

“I’m pleased to join the MediQuant team as this fast-growing industry pioneer develops next-gen technologies for data management that deliver a positive customer experience and builds hospitals’ confidence in their records,” said Cerullo. “My entrée into healthcare stemmed from offering staffing solutions but has extended to supporting breakthrough companies like MediQuant that change the dynamic and efficacy of healthcare services to support that staff.”

Cerullo served as both CEO and chair at Nordic Consulting Partners from 2015 to 2018. Previously, he served as chair and CEO of Vitalize Consulting Solutions (VCS), a healthcare IT consulting firm. Cerullo also was the chairman of Cross Country Staffing, Inc. (CCRN), a leading provider of healthcare staffing solutions. Before that, he was the CEO of TravCorps, which merged with Cross Country in 1999.

### **About MediQuant**

Founded in 1999, and headquartered in Brecksville, Ohio, MediQuant provides industry-leading data archiving solutions and comprehensive system transition data management services to help hospitals and health systems liberate their data from legacy clinical, patient accounting and ERP systems. Its flagship product, DataArk, available as a cloud-based or an on-premises platform, provides users the ability to access and work with legacy data without the legacy system security risks and expense.
