

March 13 - 17, 2023
Toddler & Casa (18 mths to 6 yrs)
Astronomy Lessons &
Traveling Planetarium (Casa)

Aspen Grove Montessori School (AGMS) - March Space Camp

Welcome to our AGMS March Space Camp! This year's camp will include various lessons and experiments related to astronomy. We will also be inviting a traveling planetarium to the school to inspire our students about space, rockets and space travel.

The universe fascinates young learners and during March Camp, students will learn that Astronomy is the study of everything in the universe beyond Earth's atmosphere, including objects we can see with our naked eyes, like the Sun, the Moon, the planets, and the stars. They will also come to understand the universe also includes objects we can only see with telescopes or other instruments, like faraway galaxies and tiny particles.

Lessons will be delivered by the qualified and professional teachers of AGMS.

Sample Lessons

LITERACY	Space Trip Patterns	Flight Plans	Rocket Name	My Space Vocabulary book	Labels in Space
MATH	Flying Comet Numbers	Rocket Tangrams	Space Count	Star Formation	Constellation Dot to Dot
ART	Bubble Print Planets	Paper Plate Aliens	Solar System Crowns	Q-Tip Stars	Star Telescope
SENSORY	Playdough Constellations	Planets and Stars Light Box	Moon Sand Craters	Starry Sky Bags	Fizzy Planets
EXPLORATION	Moon Rock Exploration Box	Magna Tile Rockets	Space Shuttle play	STEM Challenge Build A...	STEM Challenge Blueprints

Traveling planetarium – Rocket Ships

The Rocket Ship program from Astronomy in Action is a friendly and welcoming introduction to space. Children use their imagination to spot shapes in the stars, fly around the Moon, and become astronauts as they take a rocket ship ride into outer space!
