Inspire. Educate. Empower.

Why AGMS Camp Eureka?

Have you ever wondered what it would be like to explore the scientific world or find out what an architect really does? Maybe you thought it would be neat to write a book or become a real world superhero! This summer, your child will have the opportunity to explore these and other fields and discover who they want to be at Camp Eureka!

AGMS Camp Eureka is based on 4 fundamental values; discovery, exploration, inquiry, and fun!

Designed specifically for ages **18 months to 6 years** of age, Camp Eureka exposes children to interesting fields of study throughout the weekly themes. Exploration and learning will inspire our students to explore fields of study and discover what the future may hold for them through tangible experiences.

All lessons, field trips, and in-class visits are designed by teachers with extensive experience in early years education and experiential learning.

WEEK 1
JUL 2-5

Geography & World Travel

Get ready for an adventure-packed journey as we delve into the wonders of geography and world travel! Campers will dive into hands-on activities like crafting their own compasses to understand the Earth's magnetic field and creating journey sticks to map their explorations throughout the week.

WEEK 2
JUL 8-12

Animal Kingdom

This week, campers will embark on an exciting journey to explore the animal kingdom, where they learn about habitats, diets, behaviors, and unique adaptations for survival. Through hands-on experiences like jungle crawls and reptile egg science experiments, discovering animal tracks and delving into animal classification, campers will immerse themselves in the wonders of nature.

WEEK 3
JUL 15-19

Financial Literacy

Welcome to the exciting world of financial literacy, where children will learn essential skills to understand and manage money wisely. This includes activities like coin recognition, exploring concepts of saving, spending, and sharing, and empowering campers to make responsible financial decisions.

WEEK 4
JUL 22-26

Culinary Arts

Culinary arts will allow our campers to explore cooking techniques, food preparation, and understand the importance of healthy eating habits. It involves teaching children how to cook nutritious meals using fresh ingredients, introducing them to a variety of flavors and cuisines, and educating them about the nutritional value of different foods. Campers will develop an appreciation for healthy eating, allowing them to make informed choices for lifelong wellness.

WEEK 5

JUL 29- AUG 2

Adventure Engineering

Adventure engineering involves hands-on activities and projects that encourage exploration, problem-solving, and creativity in the context of outdoor adventures and challenges. Through activities like building forts, constructing bridges, or creating simple machines, children learn about engineering principles while having fun and engaging with the natural world.

WEEK 6

AUG 6-9

Musicology

Welcome to Musicology, where our campers will embark on a musical journey of discovery and creativity! Campers will explore the fascinating world of music, learning about rhythm, melody, and harmony. We will study different music styles, composers, and cultural influences, and engage in hands-on experiences like instrument exploration all the while encouraging creativity and critical thinking.

WEEK 7

AUG 12-16

Photographic Arts

This week, campers will dive into the world of photographic arts, using cameras to express themselves creatively and communicate effectively. They will learn about different techniques, visual storytelling, cultural representation, and the beauty of capturing moments through their own camera lenses, offering fresh perspectives that enrich our understanding of the world.

WEEK 8

AUG 19-23

Forensic Sciences

Our study of forensic science introduces our campers to the fascinating world of solving mysteries using science. It involves exploring techniques such as fingerprint analysis, DNA profiling, and evidence collection to uncover clues and solve crimes.
