

CC Redwheel Global Emerging Markets Fund (APIR: CHN8850AU)

Tap into Redwheel's emerging markets expertise

A proven and independent global emerging markets manager, Redwheel pragmatically combines top-down macroeconomic and thematic research with bottom-up fundamental analysis to uncover medium-to long term growth opportunities, investment themes and valuation inefficiencies in emerging and frontier markets.

CC Redwheel Global Emerging Markets Fund

In partnership with Redwheel, Channel Capital offers Australian investors access to the Redwheel Global Emerging Markets Fund (Class F Shares) (Underlying Fund) via the CC Redwheel Global Emerging Markets Fund (the Fund).

The Fund invests in the Underlying Fund which is a 'long-only' investment fund seeking to identify growing companies from emerging and frontier markets globally with strong sustainable cash flows. The Underlying Fund typically invests in 50-60 stocks and aims to offer Australian investors with portfolio diversification and growth potential.

Investment Philosophy & Process

Redwheel's investment team utilises an idea-focused, rather than index driven approach which allows it to actively allocate capital across regions and countries irrespective of index weights. Utilising its 'growth at a reasonable price' style, the team selects countries, sectors, themes and companies it believes present the strongest return prospects derived from:

- **Top down inputs:** such as macroeconomic and geopolitical analysis to identify opportunities, risks, and currency forecasts.
- **Thematic:** global approach to discover growth areas and sectors.
- **Bottom-up inputs:** monitor universe of stocks based on regional or sector coverage and identify securities that are classified as 'growth at a reasonable price'.
- **Risk management:** risk mitigation by focusing on liquidity, position sizes and overall portfolio concentrations along with unconstrained index mandated countries and securities.

The aim is to provide a global integrated research process that has been assessed on a macro level across economic, political and ESG factors to identify favourable returns for investors.

* Redwheel Global Emerging Markets Strategy is defined as the investment guidelines utilised by John Malloy in managing the Redwheel Emerging Markets Equity Master Fund Ltd, Share Class C.

^ Includes the net effect of GST and RITC.

Why Invest?

- **Access to the potential growth of emerging economies** – long term capital appreciation of companies in some of the fastest growing countries in the world.
- **A genuinely active strategy** – an index agnostic approach using macro and bottom up research to construct a portfolio of high quality growth stocks.
- **Investment team expertise** – an experienced investment team drawing on knowledge and global information networks to uncover growth opportunities across more than 60 markets.
- **Access to frontier markets** – via a specialist team who invests in some of the fastest growing countries such as Vietnam and Saudi Arabia.
- **Strong relative returns** – one of the best performing emerging market managers globally.
- **Strategic advisory relationship** – Rice, Hadley, Gates and Manuel LLC provides ongoing counsel on political, policy, risk assessment and regulation in emerging markets.

Redwheel's emerging markets equity team is comprised of 23 experienced investment professionals, some of whom have worked together for over two decades. Co-Head of Emerging & Frontier Markets, John M Malloy, Jr has over 29 years of experience in investment management, nearly all of which has been in emerging markets. John and Co-Head manager, James Johnstone along with Thomas Allraum, Co-Portfolio Manager are supported by a team of 20 dedicated emerging markets and frontier markets analysts and economists who work closely together to uncover growth opportunities across more than 60 markets globally.

Risks

Refer to the Product Disclosure Statement (PDS) for more information on risks. The key risks for the Fund include:

- **Investment risk** – amounts distributed to unitholders may fluctuate.
- **Inflation risk** – the purchasing power of an investment may not keep up to pace with inflation.
- **Liquidity risk** – ability to sell may be limited due to factors specific to a particular security, or to prevailing market conditions.
- **Regulatory risk** – may be adversely affected by changes in government policies, regulations and laws, including tax laws and laws affecting managed investment schemes.

Where does it fit in a diversified portfolio?

The Fund is open to Australian investors and can form part of a diversified allocation to global equities as a satellite component of a portfolio. It may suit investors who have a medium to long investment timeframe and a medium to very high risk/return profile. Refer to the Target Market Determination for more information.

Underlying Fund Characteristics[#]
