

## PAST PROJECT : PAEDIATRICS CLINIC AND TRAINING FACILITY

### CLIENT

- > West Gippsland Regional Hospital

### LOCATION

- > Warragul, Victoria

### ARCHITECT

- > CABA Design

### VALUE

- > \$600k

### STATUS

- > Completed Nov 2010

### SUMMARY

- > The West Gippsland Regional Hospital chose Kubale Constructions to extend and refurbish their existing Paediatrics Department facilities at their site in Warragul, Victoria. Works included the consulting suites and the internal fit-out and renovation of the Monash University Medical Training facility to a total value of \$600k.

While the construction methods were conventional, the project was challenging because the building being renovated was in continual use. Construction staff needed to pay particular attention to noise, safety, access and the presentation of the site.

This project was successfully completed on time and within budget in November 2010.

### CONSTRUCTION TECHNIQUES EMPLOYED

- > Operational site with safety complexities
- > Construction completed with minimal noise
- > Largely conventional techniques
